

Nordic/Logic seat with soft close function

Our "soft close" function gives you a high-quality, hard seat with a hydraulic damping system to ensure that the seat always meets the porcelain bowl softly and quietly. The dampers are built into the seat and do not come into contact with the porcelain surface – which greatly benefits hygiene, cleaning and function. Seats with the soft close function are available for all the toilets in the Nordic and Logic ranges. For additional information about the toilets, see the "Products" section of our "Everyday Heroes" brochure, which you can find online at www.gustavsberg.se.

Seat for Nordic toilet
