

Simply switch mixers to create a new bathroom

The mixer is the hub of the bathroom. You use it often, and actually hold it in your hand when you do. So it naturally means a great deal for the overall impression. Coloric is a little more eye-catching than other mixers. The model is available in five different colours to match your tiles, your towels or the latest fashion. The design is purely modern – and a little superior. Despite that, Coloric does not cost more than other high-quality mixers.

Environmentally friendly design

Coloric makes a big impression in the bathroom, but not so much of an impression on the environment. Where as standard mixers are coated with chrome, which is a resource-intensive process, Coloric is made of water-resistant aluminium. This is a relatively light metal, which means more fuel-efficient transport. In addition, Coloric is completely recyclable. Find out more about the most colourful mixer on the market at www.gustavsberg.se/coloric. Welcome!

The colour of Coloric is a hard anodised aluminium. This makes the finish as hard as when the mixer is chromed. The washbasin mixer comes with flexible Soft Pex connection hoses. The mixers should be mounted in accordance with the mounting instruction included.

		ART-nr	PRICE
		washbasin mixer without waste fitting Black 21 90 51-23 Silver 21 90 51-46 Champagne 21 90 51-47 Blue 21 90 51-48 Red 21 90 51-49
