

DUCENTIC

A bathroom series shaped
by our legacy

Shaped by our legacy

Our history began in 1825 when the first porcelain factory was built in Gustavsberg. Over time, Gustavsberg became the bathroom manufacturer that transformed Sweden from dirty to clean.

From the start, it was clear to us: with good design, we can improve people's lives. That's why we have always focused on the human aspect in our design process, letting the challenges and dreams of bathroom life shape our products.

And now, after generations of bathroom building, we are launching Ducentic – a brand-new, ultra-modern bathroom series with truly old roots.

A result of our long history and everything we have learned along the way from important toothbrushing sessions, unforgettable handwashes, and memorable morning rituals.

A brand new
classic

New- stalgia

120-VANITY IN BROWN OAK
with two storage drawers. A beige
stone countertop with double faucets
and a sink mixer in polished brass.

A new, historic bathroom series

Ducentic is a brand-new bathroom series with historic roots. A result of our long history, designed to last and become a reliable part of the bathroom history you will soon write together.

In every detail of the series, you will find quality, ergonomics, and durability. Here, we have combined high-quality materials that stand the test of time with design that outlasts fleeting trends.

WASHBASIN CABINET

White 60-cabinet with a white washbasin and washbasin mixer in chrome.

SINGLE-HOLE MIXER IN CHROME
With a swivel spout and adjustable maximum temperature.

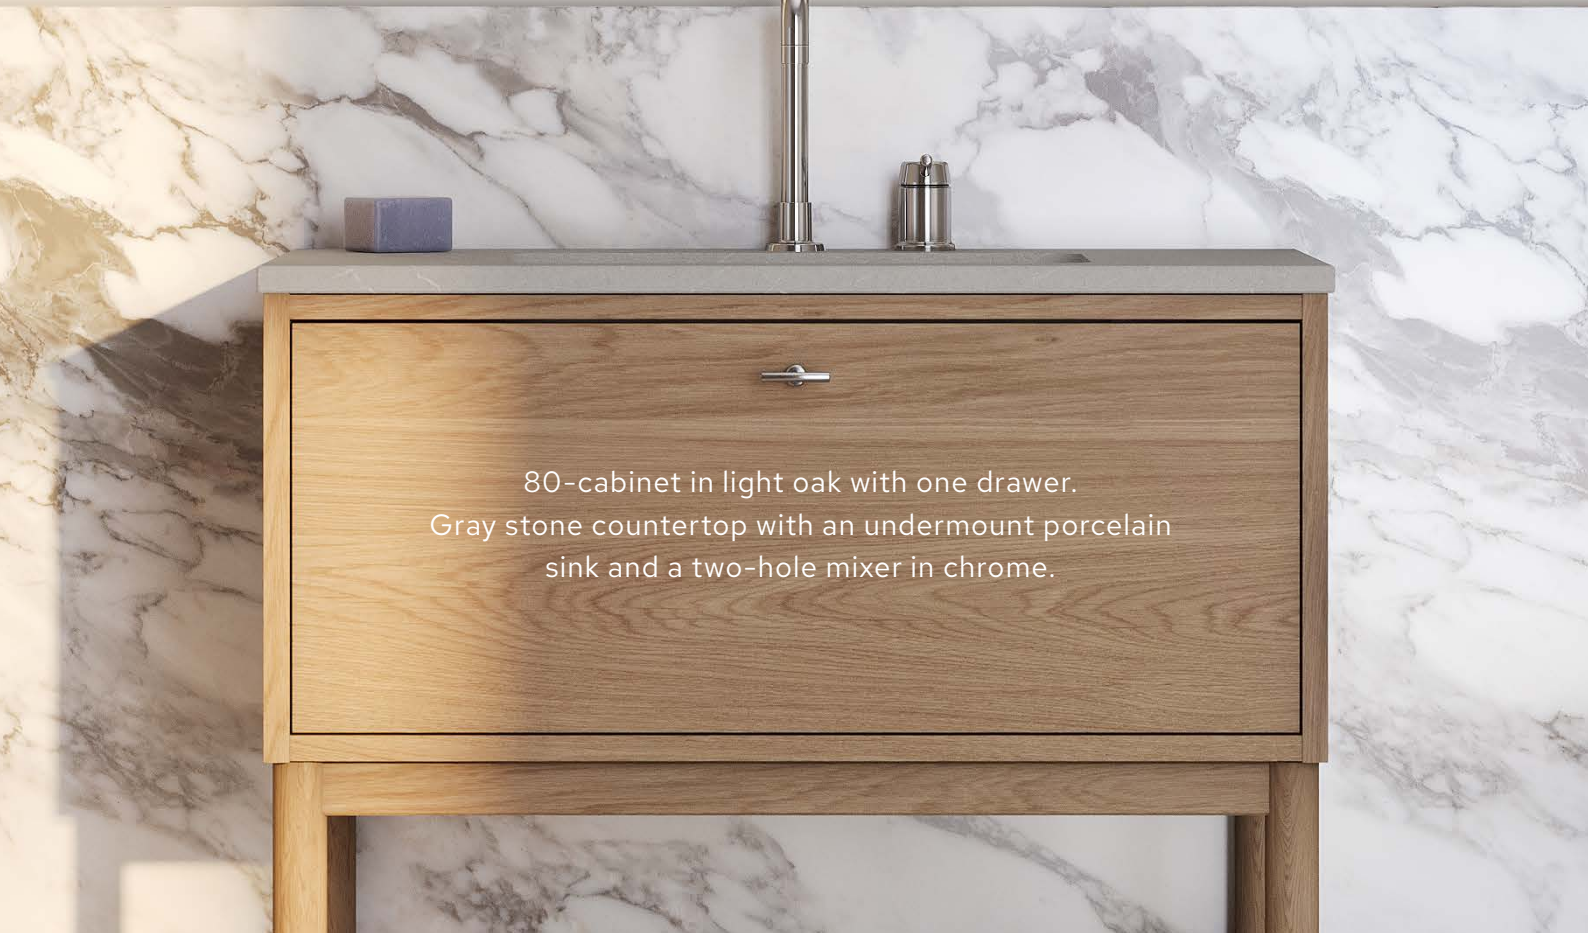

MIRROR

Rectangular mirror with rounded edges and a frame in polished steel.

Classic materials

80-cabinet in light oak with one drawer.
Gray stone countertop with an undermount porcelain
sink and a two-hole mixer in chrome.

PORCELAIN OR STONE

Our sinks are available in white porcelain, as well as in beige or gray stone countertops with an undermount porcelain sink.

BRASS OR CHROME

Elegantly polished and classic materials for a long lifespan on our showers and washbasin mixer.

LIGHT OAK AND BROWN OAK

The cabinet is available in light or brown oak veneer and with or without a solid oak leg frame.

In the Ducentic series, not only does the contemporary meet the historic. The series is also characterized by its carefully considered material choices. Here, oak, stone, steel, brass, and, of course, the foundation of our business – porcelain – come together. The materials have been selected to withstand a long and happy bathroom life and shaped to be beautiful to both look at and touch.

MIRROR CABINET
with double-sided mirrored
doors and LED strip above
and below the cabinet

TALL CABINET
with two doors and a
pull-out drawer

WASHBASIN MIXER
with separate lever
and swivel spout

Modern storage

Good storage is the key to a beautiful bathroom - regardless of whether it's small or large, and how many you're sharing it with. The collection includes vanities, mirrored cabinets, and tall cabinets, all offering generous space for efficient organization for all the stuff that so easily turns into clutter.

The tall cabinet is available with two cabinet doors or with a smart drawer in the middle for smaller accessories. Choose a model with a glass door in brown line glass for a more furnished feel in the bathroom. Behind the two cabinet doors, you'll find adjustable glass shelves that allow you to tailor the storage to your specific needs.

VANITY UNIT

The vanity's spacious drawers can be fully extended for maximum storage. In the drawer you will also find an electrical outlet that makes morning and evening routines in the bathroom easier. Of course, the drawers are soft-closing for a quiet and gentle closing.

Historic relaxing

In the Ducentic collection, you'll find showers and bathtub mixers with historic details, crafted in polished brass or chrome. The overhead shower's height can be easily adjusted, and the bath mixer's spout swivels from side to side. Don't miss the beautifully designed handles.

SHOWER
in polished brass
with adjustable
overhead shower

BATHTUB MIXER

Reliable thermostat with swivel spout,
hand shower and wall bracket.

” *Ducentic is a reflection of our long history. We call the style traditional minimalism – a future design classic.*”
