ECO-SMART BATHROOMS

INSPIRATION & INNOVATION FROM GUSTAVSBERG 2013-2014

WELCOME TO AN ECO-SMARTER BATHROOM

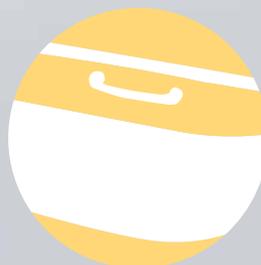

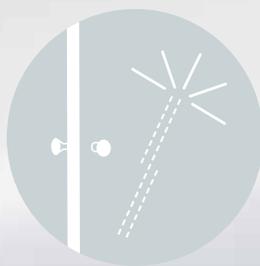

This catalogue presents the full range of eco-smart and inspiring products from Gustavsberg – everything from individual items to full-scale bathroom solutions. New this year are the brilliant and elegant furniture units from the Artic range. The softly closing doors, neat, moveable modular sections and well thought-out mirror cabinets are designed to add a whole new dimension to your bathroom experience.

Over and above all the smart and neat bathroom products, the brochure also provides an introduction to some of the people who work at Gustavsberg. In addition, you can find out how advantageous Gustavsberg's environmental work can be for you, our customers – from a financial perspective, too. We have interviewed Björn Jakobsen (founder of the Baby Björn brand), who fitted his

new art centre with no fewer than 47 guest toilets from Gustavsberg. If you are thinking about giving your bathroom a makeover, be sure to read our account of the Elmgren family's experiences in this area. The family's somewhat kitsch bathroom dated back to the 1960s. It had served its purpose well, but the time had come to replace it with a more modern solution. From Gustavsberg.

As you can see, this year's bathroom catalogue contains all sorts of interesting material. It is worth noting that Gustavsberg prices are relatively low – particularly when you bear in mind the long service life, top quality and minimal environmental impact that distinguish our products.

Welcome to an eco-smarter bathroom.

WE HELP MINIMISE YOUR CARBON FOOTPRINT.

"We use a model we call 'Gustavsberg's 6 environmental steps' on an everyday basis to help us maintain an eco-smart approach throughout all our projects. Our aim is to reduce the carbon footprint to an absolute minimum.

"And when it comes to environmentally smart products, our mixers are a shining example. They feature a built-in energy-saving function that helps you to reduce water consumption and, above all, to minimise the amount of energy needed to heat the hot water. In fact, if you were to replace all the mixers in Sweden with energy-saving models from Gustavsberg, you could actually shut down an entire nuclear power plant. It is an eco-smart function that also has a beneficial effect on your wallet.

"When we make our porcelain units, we use the residual heat from the furnaces to heat the building. In addition, we reuse the water utilised in the production process.

"We also give high priority to recycling and have therefore made an extraordinary effort to reduce the amount of packaging material used for our products. When we produced our new range of mixers, we decided to wrap the products in a simple microfibre cloth rather than using standard packaging material that is difficult to sort and recycle. Our customers can use the microfibre cloth to clean their homes, and using it also reduces their consumption of cleaning agents.

"I believe that a lot of people are unaware of how much water and energy goes to waste in their bathrooms. Therefore, I consider it to be almost an obligation for us as a company to tell people how much they can actually save by using energy-efficient mixers and economy-flush toilets. The more people use Gustavsberg products, the faster we will approach the day when we can close that nuclear power plant."

Katharina Klotz, Head of Marketing

WE NEVER BOAST. WE'D RATHER TELL YOU THE FACTS.

Our energy-saving washbasin mixers from the Nautic and Logic ranges were awarded the highest possible marks in the stringent efficiency tests developed by SIS TK 519 and Kiwa. The secret of our success is our unique heat and flow functions that result in the mixer immediately returning to its energy-saving comfort position as soon as you release the lever. In this way, it helps you to save incredible amounts of energy, water and even money – automatically. If you want hotter water or to increase the flow, simply move the mixer lever to its outermost position. Nautic and Logic models can also be

individually customised, which is yet another feature that makes Gustavsberg mixers stand out from the competition. However, as we say, we never boast. We'd rather tell you the facts.

GUSTAVSBERG'S ENERGY-SAVING NAUTIC AND LOGIC MIXERS WERE AWARDED THE HIGHEST POSSIBLE MARKS WHEN SIS TK 519 AND KIWA TESTED THE ENERGY EFFICIENCY OF A VARIETY OF MIXERS.

THIS IS HOW WE WORK WITH SUSTAINABILITY AND THE ENVIRONMENT.

Gustavsberg is proud and pleased to have been an environmentally certified company for many years. However, rather than resting on our laurels, we are working harder than ever to achieve our aim of ensuring that Gustavsberg has as little impact as possible on the environment. Our sustainability

work permeates all areas of our business, from the initial project start-up to completion of the eco-smart bathroom that saves both energy and money for you, who use it – while simultaneously helping to protect the environment.

For additional information about our work in the fields of sustainability and the environment, visit www.gustavsberg.com.

WHY SHOULD YOU CHOOSE GUSTAVSBERG?

A THE ENVIRONMENT

We at Gustavsberg take our environmental work extremely seriously. In fact, we have developed our own sustainability model – Gustavsberg’s 6 Environmental Steps – which is intended to help minimise our own carbon footprint, as well as that of our users.

B FINANCE

Gustavsberg products are priced in the medium range, but they are very cheap to own. With Gustavsberg’s patented energy-saving technology, you can “earn” (i.e. save) a lot of money every year, while still helping to protect the environment. Our innovative economy-flush WCs and patented energy-saving mixers have attracted a lot of attention worldwide, and have won a variety of awards and prizes.

C QUALITY

A good bathroom should last and function smoothly for years and years. And as a bathroom comprises many different components that all interact, it is important to ensure that all the products maintain the same high standard of quality.

D SPARE PARTS

If the worst should come to the worst and something in your bathroom breaks, then it is good to know that we are there to help people who have purchased our products, and that we have spare parts and replacement products that bear the Gustavsberg label.

E BROAD RANGE

Gustavsberg is something as extraordinary as a complete bathroom supplier. Our broad range comprises everything you need for your bathroom: everything from economy-flush WCs to washbasins, showers, bathtubs, massage baths, bathroom furniture, bidets and smart mixers. Simply pick the items you like the best and put together your own, personalised bathroom.

F FLEXIBILITY

No matter how big or small your bathroom is, or how your home is laid out, you are sure to find all kinds of great options at Gustavsberg. For example, our WCs are available in both floor-mounted and wall-mounted models. We also have showers, bathtubs and furniture units in a variety of designs and finishes. For small, compact bathrooms, we have designed a particularly space-efficient range with a neat washbasin and versatile furniture. The same applies for people looking for a large and exclusive bathroom; we have wonderful solutions in this area, too. As we – and our homes – are all different, Gustavsberg must naturally make sure that you are always completely satisfied, whatever you are looking for.

G SMART DESIGN

For us at Gustavsberg, there is more to design than just a pretty surface. Design has just as much to do with finding smart solutions to practical problems, such as creating beautiful bathroom environments. Over the years, we have had the pleasure of working with a number of innovative designers including Stig Lindberg, Carl-Arne Breger and – most recently – Jon Eliasson, who share our broader perspective of the concept of design. A perfectly designed bathroom is to be a pleasure to look at, and simple to use.

WHERE TO BUY GUSTAVSBERG

Gustavsberg products are on sale in most well-stocked bathroom shops, plumbing outlets and DIY stores. On our website – www.gustavsberg.se – there is a link marked “Where to buy” in the top right-hand corner. Click this link and enter your post code or location in the appropriate field. The address of your nearest dealer (in Sweden) will then be displayed on the screen along with a map.

If there are no dealers near your home, or if you cannot find the product you are looking for, contact our customer service department on +46 8 570 391 00 or at info@gustavsberg.com and we will do our very best to help you.

THE GEOGRAPHICAL PROXIMITY TO STOCKHOLM'S UNIQUE ARCHIPELAGO FUNCTIONS AS A CONSTANT REMINDER OF THE BEAUTY AND FRAGILITY OF NATURE. IN ORDER TO PRESERVE OUR SHARED ENVIRONMENTAL HERITAGE FOR FUTURE GENERATIONS, EVERY COMPANY HAS AN OBLIGATION TO DO ITS VERY BEST TO MINIMISE ITS ENVIRONMENTAL IMPACT.

A NEW BATHROOM FOR THE ELMGREN FAMILY

The Elmgren family had long been planning to renovate the old bathroom in their 1960s villa. The discovery of an area of damp damage brought the planned work forward. But how were they

actually to tackle the project? What did they have to take into consideration? Below, we present the family's own account of their route to a new bathroom.

1960S DESIGN CAN BE CHARMING, BUT IT IS NOT ALWAYS FUNCTIONAL

Lotta: "We contacted an architect early on to help us envisage how to relocate walls and position the fixtures and fittings. We could then choose between a range of different options."

Linus: "Experience from a previous bathroom renovation suggested that it would be good to get professional help. After all, this isn't what we do for a living ..."

Lotta: "To start with, we sketched in everything we wanted, but we soon found out that we didn't have enough space and that it would be really difficult to fit everything together. So we thought about it a bit more and finally came up with a good solution. Instead of having two washbasins, we will have a large bathtub along with generous surface space around the single washbasin.

We think this is a good compromise."

Linus: "After 'testing the waters' in the stores, we decided to go with Gustavsberg, largely on account of the company's environmental position. Of course, we also like the fact that it's Swedish – that makes it more trustworthy in some respect. It feels like it will last a long time. I don't know if it's true, but that's the way it seems to us. After all, renovating a bathroom isn't something you do unless you have to. So you want something timeless and durable."

Lotta: "When we read about the products, we thought that the energy-saving mixer was an important addition; so is the ceramicplus finish ... there's an environmental aspect to it that we like. And then there's the fact that we renovated a bathroom once before, when we lived in town. Back then, we had a good look around and fell for Gustavsberg. So it was quite easy for us to choose Gustavsberg again."

THE GENEROUS LOGIC BATHTUB HAS BEEN GIVEN PRIDE OF PLACE IN THE FAMILY'S NEW BATHROOM.

THE ELMGREN FAMILY'S CHOICES.

Lotta: "It's been fun, but a bit difficult to choose products. "Gustavsberg has a really big range, so there are all kinds of options. Even

though the architect helped us in the planning phase, we're all excited that we'll soon be seeing the actual finished result."

THE ELMGREN FAMILY'S PLAN.

The family commissioned an architect to help them plan their new bathroom.

Linus: "With a good architect and good products, you can't go wrong."

17 SMART SYMBOLS

To make it simple for you to recognise all the benefits of Gustavsberg's smart bathroom products, we have come up with 17 illustrative symbols. These symbols will appear here and there in this catalogue to provide additional information about the products' underlying functions, which may not always be immediately visible.

ENERGY-SAVING

A REVOLUTIONARY ENERGY-SAVING FUNCTION THAT CAN HELP REDUCE YOUR ENERGY CONSUMPTION BY 50%. THE SIMPLE SOLUTION IS BASED ON THE FACT THAT YOU HAVE TO MOVE THE LEVER ACTIVELY ALL THE WAY TO THE LEFT TO REACH THE MAXIMUM WATER TEMPERATURE. WHEN YOU RELEASE THE LEVER, IT AUTOMATICALLY RETURNS TO THE PRESET COMFORT TEMPERATURE, APPROX. 38–40 °C. THE COMFORT TEMPERATURE IS FULLY ADJUSTABLE TO MATCH INDIVIDUAL PREFERENCES.

WATER-SAVING

THIS MIXER HELPS YOU AVOID USING MORE WATER THAN NECESSARY. THE STARTING POSITION PROVIDES A PRESET COMFORT FLOW, WHICH IS SUFFICIENT FOR WASHING UP OR WASHING YOUR HANDS. FOR EXAMPLE, TO OPEN THE FULL FLOW, YOU NEED TO LIFT THE LEVER TO ITS HIGHEST POSITION. WHEN YOU RELEASE THE LEVER, IT AUTOMATICALLY RETURNS TO THE COMFORT FLOW POSITION. THE FLOW FUNCTION IS FULLY ADJUSTABLE TO SUIT INDIVIDUAL PREFERENCES.

ECO-START

AN ENERGY-ECONOMICAL MIXER THAT STARTS AUTOMATICALLY AT A TEMPERATURE OF 17 °C FROM ITS STARTING POSITION (LEVER STRAIGHT AHEAD), HELPING YOU SAVE BOTH ENERGY AND MONEY.

SENSOR-CONTROLLED MIXER

THE SMART SENSOR TECHNOLOGY AUTOMATICALLY HELPS YOU TO SAVE ENERGY AND AVOID WASTING WATER. THE MIXER TURNS ON WHEN YOU PLACE YOUR HANDS IN THE APPROPRIATE POSITION, AND SHUTS OFF AGAIN AS SOON AS YOU REMOVE THEM. DURING CLEANING, COVER THE SENSOR EYE TO DISABLE THE MIXER TEMPORARILY. POWERED BY A STANDARD BATTERY OR TRANSFORMER.

EVEN TEMPERATURE

THERMOSTATIC MIXERS FEATURE BUILT-IN AUTOMATIC SCALD PROTECTION AND HOT-WATER SAFETY STOP WITH TYPE-APPROVED NON-RETURN VALVES. THIS MEANS THAT THE MIXERS REACT QUICKLY TO THE CHANGES IN TEMPERATURE AND PRESSURE THAT CAN ARISE IN THE WATER FLOW, AND EVEN OUT THE DIFFERENCES.

ANTI-BACTERIAL COLOURS

THE MIXER'S ANTI-BACTERIAL SURFACE TREATMENT ON ALL PAINTED LEVERS AND HANDLES COUNTERACTS THE SPREAD OF BACTERIA (SUCH AS PNEUMOCOCCI AND MULTI-RESISTANT BACTERIA), VIRUSES AND FUNGI, FOR EXAMPLE. THE SURFACE TREATMENT HAS A LONG-TERM EFFECT, PROVEN FOR AT LEAST FIVE YEARS.

AUTO-REPAIR COLOURS

THE MIXER FEATURES UNIQUE AUTO-REPAIR PROPERTIES, WHICH MEAN THAT MINOR SCRATCHES THAT APPEAR ON PAINTED LEVERS AND HANDLES IN THE LOGIC RANGE QUITE SIMPLY DISAPPEAR ON THEIR OWN. THE PAINTED SURFACE TREATMENT MAKES THE MIXER MORE DURABLE AND REDUCES THE RISK OF BACTERIA SPREADING.

SOFT CLOSE FURNITURE

THE ACOUSTICS IN A BATHROOM CAN RESULT IN LOUD, SUDDEN NOISES BEING PARTICULARLY IRRITATING. WITH SOFT-CLOSE FUNCTIONALITY, CABINET DOORS AND DRAWERS CLOSE GENTLY AND QUIETLY.

CLEAR GLASS

SHOWER WALLS ARE CONSTANTLY SUBJECTED TO WATER, SOAP, OILS, SHAMPOO AND LIMESCALE. FOR THIS REASON, ALL GUSTAVSBERG SHOWERS ARE FITTED WITH "CLEAR GLASS" – A PROTECTIVE EXTERIOR LAYER THAT FACILITATES CLEANING AND HELPS REDUCE THE AMOUNT OF DETERGENT YOU NEED TO USE.

TILT-IN

THE BOTTOM EDGE OF SHOWER CORNERS, WHERE THE DOOR MEETS THE FLOOR PROFILE, IS USUALLY VERY DIFFICULT TO KEEP CLEAN. OUR "TILT-IN" FUNCTION MAKES IT SIMPLE FOR YOU TO REMOVE THE SHOWER DOORS FROM THE FLOOR PROFILE FOR MORE EFFICIENT CLEANING AND IMPROVED HYGIENE.

ELEVATING HINGE

THE ELEVATING HINGE IS A SMART DETAIL THAT LIFTS THE SHOWER DOOR 5 MM EVERY TIME YOU OPEN AND CLOSE IT. THIS MINIMISES WEAR ON BOTH THE FLOOR AND THE SHOWER DOORS. A PRACTICAL FUNCTION THAT PROVIDES A SENSE OF AUTHENTIC LUXURY.

GLAZEPLUS

OUR BATHTUBS ARE AVAILABLE WITH AN EXTRA SURFACE TREATMENT CALLED "GLAZEPLUS". THIS IS A CRYSTAL-CLEAR POLYMER FILM THAT PROTECTS THE SURFACE OF YOUR BATHTUB AGAINST DIRT AND LIMESCALE DEPOSITS – WHICH FACILITATES CLEANING AND REDUCES THE AMOUNT OF DETERGENT YOU NEED TO USE.

ANTI-SLIP

THE BATHTUB IS AVAILABLE WITH AN ANTI-SLIP TREATMENT WHERE QUARTZ SAND HAS BEEN BURNED INTO THE ENAMEL IN AN AESTHETICALLY NEUTRAL PATTERN. THE SURFACE COUNTERACTS THE RISK OF SLIPPING WHEN ENTERING OR LEAVING THE BATHTUB. MOREOVER, IT IS LOCATED AT THE FOOT END OF THE TUB SO THAT IT DOES NOT AFFECT THE OVERALL BATHING EXPERIENCE.

SUPPORT HANDLES

YOU CAN ORDER THE BATHTUB WITH SUPPORT HANDLES ON THE RIM TO IMPROVE SAFETY AND EASE OF USE.

CERAMICPLUS = C+

MANY OF OUR PRODUCTS ARE AVAILABLE WITH C+ SURFACE TREATMENT. THIS PROVIDES THE PORCELAIN WITH A DIRT-REPELLENT SURFACE THAT PREVENTS THE ACCUMULATION OF LIMESCALE AND DIRT. C+ IS ALSO GOOD FOR THE ENVIRONMENT, AS IT MEANS THAT YOU CAN USE A Milder DETERGENT – AND LESS OF IT! – WHEN CLEANING.

QUICK RELEASE

WITH QUICK-RELEASE FUNCTIONALITY, YOU CAN REMOVE THE WC SEAT FROM THE BOWL EASILY AND WITHOUT TOOLS. THE SEAT AND TOILET CAN THEN BE CLEANED SEPARATELY, WHICH IS BOTH SIMPLER AND MORE HYGIENIC.

SOFT CLOSE

HARD, SOLID TOILET SEATS HAVE PREVIOUSLY BEEN ASSOCIATED WITH LOUD NOISES WHEN THEY ARE LOWERED. SOFT CLOSE FUNCTIONALITY HAS SOLVED THIS PROBLEM THROUGH THE INTRODUCTION OF A DAMPER THAT IS BUILT INTO THE SEAT TO ENSURE THAT IT CAN BE LOWERED GENTLY AND QUIETLY. THE DAMPER HAS NO DIRECT CONTACT WITH THE PORCELAIN, WHICH FACILITATES CLEANING AND MAKES THE SEAT MORE HYGIENIC.

“MULTIPLE ENERGY-SAVING FUNCTIONS IN ONE AND THE SAME MIXER MAKE GUSTAVSBERG UNIQUE”

BERNDT LARSSON PRODUCT DEVELOPER

When you buy a mixer from Gustavsberg, you can be sure of buying both quality and smartness. Our challenge is to ensure that the products are not viewed as being overly technical – we want to highlight user-friendliness and personal needs instead. Gustavsberg has long been at the international cutting edge as regards environmental consideration and energy-saving functions, and we have a range of patented solutions to our name.

A key starting point has always been to make sure that the savings we make do not adversely affect comfort. For this reason, the mixers feature functions that focus more on promoting eco-friendly and economic behaviour than on limiting the flow or temperature of the water. Our water and energy-saving functions help significantly reduce operating costs as compared to the products made by many of our competitors. We always choose eco-friendly components, and the long service lives of our products guarantee reduced environmental impact. All our mixers – single lever, thermostatic and sensor controlled – feature energy and water-saving functions as standard.

If necessary, you can deactivate or adjust the preset comfort flow or temperature, and you can do so easily and without having to use any specialist tools. This means that you can adapt our mixers to suit your own personal requirements. Another example of our smart solutions is to be found in our most recent Logic range, where, in addition to the energy saving functions, we have added an auto-repairing and anti-bacterial coating to the coloured details on the mixers. And this new surface treatment is environmentally friendly, too.

WE WANT TO BE SMARTER DOWN TO THE SMALLEST DETAIL

In the face of the tough competition that prevails today, a company will rarely – if ever – have a chance of surviving unless it succeeds in living up to its customers’ high demands and expectations. We at Gustavsberg work tirelessly to improve our products, at all levels and down to the smallest detail. For example, our packaging has been specially designed to make it simple to stock and easy to handle for our plumbers and fitters. The more quickly and easily the installation work can be completed, the cheaper it will be for you, the customer. In addition, the design of the packaging helps reduce the risk of repetitive strain injury among fitters. We are convinced

that a happier fitter will do a better job – which will also benefit you as the customer.

GUSTAVSBERG RECEIVED RECOGNITION FOR ITS ENVIRONMENTALLY SMART PACKAGING SOLUTIONS FOR THE NAUTIC RANGE WHEN THE SOLUTIONS WON THE PRESTIGIOUS IF PACKAGING AWARD.

ARTIPELAG SKILLED IN THE ART OF SELECTING TOILETS.

Located on the island of Värmdö just east of Stockholm, Artipelag is the latest addition to the range of large art centres in Sweden. The two-storey building was designed by the architect Johan

Nyrén. It features a 5,000 m² exhibition area and has been fitted with fully 47 toilets.

“I HAVE NOTHING BUT GOOD EXPERIENCES
WITH GUSTAVSBERG PRODUCTS”

BJÖRN JAKOBSON FOUNDER OF ARTIPELAG

When we created Artipelag, we wanted people to say: “Wow, this is really amazing!” And that is what we are hearing today... We are getting a huge amount of praise for the installation that architect Johan Nyrén designed. There are meadows here, as well as deciduous woods with all kinds of trees. We have a long beach with a promenade that disabled people can enjoy as well. In addition, the boat ride from Stockholm through Skurusundet and Lännerstaviken is a real treat, and if you want to come by car, we are only 15 minutes from the city – there is motorway almost all the way.

Johan Nyrén also took care to fit Artipelag with a great many toilets, both for our visitors and for the artists who perform here. That is why we have 47 Gustavsberg toilets installed today. I think it’s incredibly important to make sure that the toilets are clean, neat, well maintained and accommodating. When it comes to Gustavsberg toilets, one of the main benefits is that they are economical to flush. I also think that Gustavsberg’s taps are really straightforward to use – which isn’t always the case for some of the mixers on the market today. In addition, I prefer sensor-controlled taps because they shut off automatically. And if you have a hearing disability – like I do – you can’t always hear that a tap is running.

I consider Gustavsberg to be a serious company that thinks about the environment and goes to the trouble of making it easy for customers to understand and use the products it sells. I have had nothing but good experiences with Gustavsberg products. We are really satisfied. I haven’t heard any comments about the fixtures, which means that they are doing their job very well.

BJÖRN JAKOBSON IS ONE OF THE MOST FAMOUS ENTREPRENEURS IN SWEDEN. HE FOUNDED THE COMPANY “BABY BJÖRN” BACK IN THE 1960S.

ARTIPELAG IS EQUIPPED WITH 47 TOILETS, MANY OF WHICH ARE SUITABLE FOR DISABLED PEOPLE.

DO YOU PREFER BEAUTY TO INTELLIGENCE?

Choosing a new bathroom is a bit like choosing a new partner. Are you more interested in physical beauty, or what lies beneath? With a bathroom from Gustavsberg, you don't have to choose because we deliver both beauty and intelligence in the same package. The attractive shapes conceal a host of smart innovations that make everyday life better – and, above all – easier for you. The fact that Gustavsberg products are inexpensive to use and gentle on the environment is an added bonus. Briefly put, when you choose Gustavsberg, you can be sure of an eco-smart bathroom that is also a pleasure to look at. The broad Gustavsberg range contains

everything you need in all kinds of models and formats. Washbasins, WCs, cabinets and shelves. Mixers, showers, baths and whirlpools. You name it – Gustavsberg's got it. Naturally, you can mix and match all the products, which allows you to put together a fully personalised bathroom. The following pages present a range of inspiring examples of what your new bathroom might look like. So flick through the pages, think about it and be inspired. And remember – a bathroom from Gustavsberg gives you both intelligence and beauty in the same package.

LITTLE & LUXURIOUS

Even if you only have a small bathroom, you can still do a lot with it. With elegant furniture from our new Artic range, you can create a de luxe hotel ambience without it costing you an arm and a leg. The intricate module drawers and quietly closing doors of the Artic range are just two examples of how smart, flexible and luxurious a little bathroom can be. The furniture is available in a range of models and colours.

MEDIUM & TRENDY

Thanks to the extensive Gustavsberg range, it is easy to create a completely individual bathroom. So why limit yourself to a single look when you can draw inspiration from several wonderful styles at the same time? This “industrial-rural” example is perfect for standard-size bathrooms. The new furniture, porcelain and mixers are all from the Logic range.

MEDIUM & ECO-SMART

This attractive bathroom inspired by functionalism conceals a host of eco-smart and functional details. Take our award-winning Nautic washbasin mixer as an example: its built-in energy-saving function helps you to save water, energy and money. Automatically. This is a neat, functional and eco-smart option for normal size bathrooms.

LARGE & GLAMOROUS

Some people say that the bathroom is the new status symbol, and we at Gustavsberg are tempted to add our weight to this claim. The increasing demand for larger and more luxurious solutions has given us the chance to cultivate our more glamorous and design-intensive side. In our example of a large bathroom, you will find exclusive furniture, double washbasins, sensor-controlled mixers, a shower and bathtub and, of course, an elegant, wall-mounted WC.

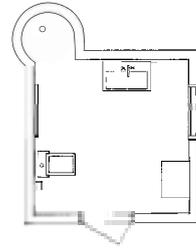

LITTLE & LUXURIOUS

Dark, elegant furniture units from our new Artic range, combined with beautiful, understated porcelain generate an exclusive hotel ambience. The mirror cabinet features a lighting rail above it, as well as concealed lighting below, which ramps up the intimacy level.

(The lighting below the washbasin cabinet is a special installation not included as standard in the product).

THE WC IS AVAILABLE IN BOTH FLOOR-MOUNTED AND WALL-MOUNTED MODELS AND COMES WITH A BLACK OR WHITE SEAT.

ARTIC WC 4300. ARTIC WASHBASIN CABINET 48100 IN BLACK OAK, FITTED WITH ARTIC WASHBASIN AND HANDLE F192 IN ANTHRACITE. COLORIC WASHBASIN MIXER IN SINFUL BLACK. ARTIC MIRROR CABINET 4888 10 IN BLACK OAK INCLUDING LIGHTING RACK. ARTIC 4870 IN BLACK OAK WITH HANDLE F192 I ANTHRACITE. SHOWER SET G2. COLORIC THERMOSTATIC SHOWER MIXER IN SINFUL BLACK. G1 TOWEL HOLDER. G1 TOILET ROLL HOLDER. TILES BY VILLEROY & BOCH, FIRE & ICE

THE WASHBASIN CABINET FEATURES GENEROUS AND ADAPTABLE STORAGE SPACE AND A WASHBASIN. THERE IS A CONCEALED ELECTRICAL SOCKET INSIDE THE MIRROR CABINET AND THE BOTTOM EDGE OF THE MIRROR DOOR IS FITTED WITH A BLASTED EDGE TO ELIMINATE THE PROBLEM OF FINGERPRINTS. THE INCLINED DESIGN OF THE COLORIC MIXER UNDERPINS THE DE LUX HOLISTIC IMPRESSION.

ARTIC WASHBASIN CABINET 48100 IN BLACK OAK FITTED WITH ARTIC WASHBASIN 4551 AND HANDLE F192 IN ANTHRACITE. COLORIC WASHBASIN MIXER IN SINFUL BLACK. G1 TOWEL HANGER.

THE MOVABLE DRAWER INSERT IN THE ARTIC FURNITURE UNITS ASSURE FLEXIBLE STORAGE. SOFT CLOSE TECHNOLOGY ENSURES THAT DRAWERS AND DOORS SHUT SILENTLY.

THE COLORIC MIXER IS MADE OF RECYCLABLE ALUMINIUM AND COMES IN ONE OF FIVE EXPRESSIVE COLOURS.

THE FLOOR-MOUNTED VERSION OF THE ARTIC WC CAN BE INSTALLED VERY CLOSE TO THE WALL BUT STILL ALLOWS PLENTY OF SPACE FOR WALL-MOUNTED PIPEWORK.

LUXURY THROUGH AND THROUGH

A de luxe bathroom experience involves not only beauty, but also comfort and functionality. This is what we bore in mind when designing our new range of authentic Artic furniture. The units are available in a variety of sizes and finishes: Black Oak, Natural Oak and Matte White.

ARTIC TALL CABINET 4870 IN BLACK OAK WITH HANDLE F192 IN ANTHRACITE.

BOTH TASTEFUL AND FUNCTIONAL. EFFECTIVE STORAGE SOLUTIONS FREE UP FLOOR SPACE, WHICH IS PARTICULARLY IMPORTANT IN SMALL BATHROOMS.

LITTLE & LOGICAL

The Gustavsberg range features a wide variety of bathroom products designed specifically for small bathrooms.

The washbasin and the furniture shown here are extra slim to help make maximum use of the available space. The wall-mounted WC not only saves space, but is also simple to keep clean. Of course, both the quality and the finish are of the finest standard.

LOGIC, OUR VERSATILE BATHROOM RANGE, HELPS YOU TO MAKE THE MOST OF EVERY LAST CENTIMETRE IN YOUR BATHROOM. THE FURNITURE AND WASHBASIN ARE NEATLY AND PRACTICALLY DESIGNED.

LOGIC WASHBASIN CABINET 1860 FITTED WITH WASHBASIN, DRAWER FRONT IN MOODY BLUE AND HANDLE C. LOGIC WASHBASIN MIXER WITH MOODY BLUE LEVER. MIRROR 1835. LIGHTING RACK 1831. LOGIC TALL CABINET 1870 WITH DOORS FRONT IN MOODY BLUE, HANDLE C. LOGIC WC 5693 WITH HARD SEAT, TRIOMONT PNEUMATIC FLUSH BUT TON. G1 TOILET PAPER HOLDER. G1 HOOKS. G1 TOILET BRUSH. FLOOR TILES BY MARRAKECH DESIGN

LOGIC IS THE BATHROOM THAT CAN SWITCH IDENTITY. EXCHANGEABLE LEVERS FOR THE MIXER AND EXCHANGEABLE PANELS FOR THE CABINETS AND DRAWERS MAKE YOUR BATHROOM EVEN MORE PERSONAL. THE ONLY THING YOU HAVE TO DECIDE IS WHICH OF OUR MOOD COLOURS TO CHOOSE ... AND OF COURSE, IF YOU CHANGE YOUR MIND, YOU CAN SIMPLY CHOOSE A NEW ONE.

LOGIC WASHBASIN CABINET 1860 FITTED WITH WASHBASIN. DRAWER FRONT IN MOODY BLUE AND HANDLE C. LOGIC WASHBASIN MIXER WITH LEVER IN MOODY BLUE.

FLAT SURFACES AND SMART STORAGE

In addition to a generous drawer, the Logic washbasin cabinet also features a shelf to provide extra storage capacity.

With a water trap that has been specially designed for installation with our washbasin unit, you will have even more space for your things. The handle is available in three different models – choose the one that best suits your bathroom. The drawers and doors are prepared for installation of the handles, but not fully drilled.

Logic's slim washbasin has a surprisingly large flat surface in relation to its size, and the mixer is fitted with energy-saving functions to help you save money and protect the environment. In addition, it features an anti-bacterial, auto-repairing surface that prevents scratches forming.

SLIM CABINET MAKES ROOM

Small, cramped spaces need a bit of extra thought when it comes to interior design. Logic bathroom furniture is available in a variety of sizes and depths. This means that you can now make use of the small space behind the door that is usually ignored and forgotten. It is actually perfect for Logic's slim tall cabinet.

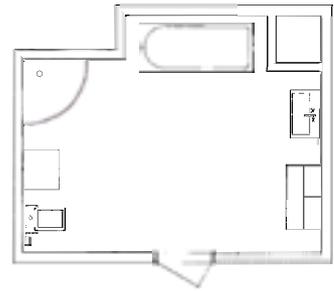

MEDIUM & TRENDY

Thanks to the broad Gustavsberg range, it is easy to create a completely individual bathroom. This "industrial-rural" example for a normal size bathroom includes furniture units, a bathtub and a shower. The products are drawn from different Gustavsberg ranges, and together, they create a unique and fascinating impression.

HERE WE HAVE POSITIONED A SPECIALLY MADE POLISHED CONCRETE WORKTOP ON A WASHBASIN CABINET FROM THE LOGIC RANGE. NOTE THE NEAT CONTRAST BETWEEN THE RURAL DRAWER FITTINGS AND THE CONCRETE.

LOGIC WC-BOWL 5693 WITH BLACK SEAT. TRIOMONT PNEUMATIC WALL MOUNTED CONTROL PANEL IN WHITE GLASS.

SQ SHOWER CORNER WITH ROUNDED SWING DOORS AND CHROMED PROFILES. LOGIC THERMOSTATIC SHOWER MIXER WITH KNOBS IN PERFECT WHITE. SHOWER SET NAUTIC II. G2 TOWEL HANGER.

BATHTUB 6316 IN SINFUL BLACK FITTED WITH CHROMED FEET AND CHROMED DRAIN PIPE. LOGIC THERMOSTATIC BATHTUB MIXER WITH KNOBS IN PERFECT WHITE. SKANDIC HAND SHOWER AND WALL MOUNTING.

TILES BY VILLEROY & BOCH. FLOOR; PRO ARCHITECHTURA. WALLS; CREATIVE SYSTEMS

LIVELY, TRENDY AND PRACTICAL. THAT IS THE RESULT WHEN YOU COMBINE TWO WASHBASIN CABINETS FROM OUR NEW LOGIC RANGE WITH A MIRROR CABINET AND WALL CABINET. SOFT CLOSE TECHNOLOGY ENSURES THAT DRAWERS AND DOORS SHUT SILENTLY.

LOGIC WASHBASIN CABINET 1892 FITTED WITH WASHBASIN, DOORS IN CLASSY WHITE AND HANDLE D. LOGIC WASHBASIN MIXER WITH LEVER IN PERFECT WHITE. LOGIC WASHBASIN CABINET 1862, DOORS IN CLASSY WHITE AND HANDLE D. TOP IN CAST CONCRETE ORDERED FROM CARPENTRY. LOGIC MIRROR CABINET 1882 60 FITTED WITH LIGHTNING RACK. LOGIC WALL CABINET 1810, DOORS IN CLASSY WHITE AND HANDLE D.

STRIKING CONTRASTS

Daring to move away from the classic white tub and choosing a black, claw-foot bathtub can create quite an impact. The lack of bathtub panels makes it easy to reach all areas when cleaning the room. The tub is also available with black or white feet.

BATHTUB 6316 IN SINFUL BLACK FITTED WITH CHROMED FEET AND CHROMED DRAIN PIPE. LOGIC THERMOSTATIC BATHTUB MIXER WITH KNOBS IN PERFECT WHITE. SKANDIC HAND SHOWER AND WALL MOUNTING.

NEAT & SMART STORAGE

Spacious drawers and cabinets make it easy to keep all the items in order. Clean, clinical surfaces make the bathroom a pleasure to use. The result is both neat and smart.

OUR ECO-SMART LOGIC MIXERS FEATURE A REPLACEABLE LEVER THAT IS AVAILABLE IN FIVE MOOD COLOURS.

A WALL-MOUNTED GUSTAVSBERG WC WITH A MATCHING WHITE GLASS FLUSH BUTTON ADDS AN AUTHENTIC TOUCH OF ELEGANCE TO THE BATHROOM. IT IS GOOD TO KNOW THAT ALL GUSTAVSBERG WCS ARE ECO-NOMY-FLUSH MODELS AND THAT THEIR NEAT LINES FACILITATE CLEANING. THE WC SEAT, WHICH IS AVAILABLE IN BLACK AND WHITE, CLOSES QUIETLY THANKS TO THE SOFT CLOSE FUNCTION. THE PORCELAIN PRODUCTS CAN BE SUPPLIED WITH CERAMICPLUS – A PROTECTIVE SURFACE COATING THAT HELPS PREVENT THE BUILD-UP OF DIRT AND LIME SCALE.

LOGIC WC-BOWL 5693 WITH BLACK SEAT. TRIOMONT PNEUMATIC WALL MOUNTED CONTROL PANEL IN WHITE GLASS.

LOGIC TALL CABINET 1870 WITH DOORS IN CLASSY WHITE AND HANDLE D

BRILLIANT SHOWER WALLS

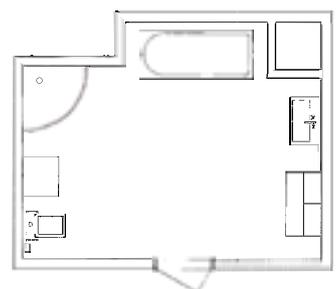

No matter how big or small your bathroom may be, a little extra floor space is always welcome. With our SQ solution, the shower walls can fold inwards when the shower is not in use, freeing up valuable floor space. The elevating hinge is another smart detail. It lifts the shower door 5 mm every time you open and close it. This minimises wear on both the floor and the shower doors.

A tall cabinet that is just 16 cm deep is not in the way when you open the shower doors, but it still provides valuable storage space.

DESIGN YOUR OWN THERMOSTAT

We at Gustavsberg have long been coming up with creative solutions for the bathroom, and now it is your turn to have a go yourself. With our unique Logic thermostatic mixer, you can change the colour of the handle quickly and easily. Choose from four mood colours: Perfect White, Moody Blue, Crazy Orange and Sinful Black. Classy Chrome is delivered as standard when you buy the mixer.

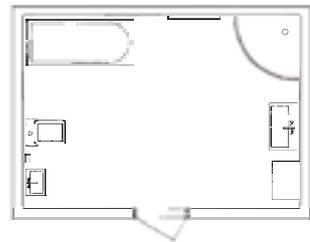

MEDIUM & ECO-SMART

This beautiful example for a normal size bathroom is inspired by the concept of functionalism and conceals a variety of eco-smart solutions from our award-winning Nautic range. What do you say to a quiet, economy-flush WC, energy classed mixer and tilt-in shower walls, to name just a few examples ... As the name suggests, the functionalist movement centres on functional design, and Gustavsberg has added "ergonomic", "energy-saving" and "financially beneficial" to the concept. Simply put, an eco-smart bathroom.

THE ROTARY SPOUT ON THE BATHTUB MIXER IS AN EXAMPLE OF A SMALL BUT NEAT DETAIL THAT IMPROVES YOUR BATHROOM EXPERIENCE.

BATHTUB 1707 WITH FULL FRONT FRAME. G2 TOWEL HOLDER. NQ SHOWER CORNER WITH ROUNDED SLIDING DOORS AND PROFILES IN CHROME. NAUTIC THERMOSTATIC SHOWER MIXER. SHOWERSET NAUTIC II. NAUTIC MIRROR CABINET A402 60. NAUTIC TALL CABINET A673. NAUTIC WASHBASIN 5560 WITH PEDESTAL 2920. NAUTIC WASHBASIN MIXER. WALL TILES BY KAKELKOMPANIET. VOUGE OLIVA IN . FLOOR TILES BY STENFIRMA BROR TÖRNER. MARMOR VERDE ST:NICOLAUS

THE CLEAN, CLINICAL LINES OF THE WASHBASIN COMBINED WITH ITS ROUNDED CORNERS AND ELLIPTICAL BASIN MAKE CLEANING EASY. THE ROUNDED SHAPE SAVES SPACE WHILE PROVIDING PLENTY OF SURFACE AREA. THE WASHBASIN PEDESTAL EFFECTIVELY CONCEALS THE DRAIN AND WATER TRAP.

1. A HAND-SHOWER BY THE WC CAN BE USED AS A BIDET AND FACILITATES CLEANING.
2. WITH A NAUTIC MIXER, YOU LITERALLY DO NOT HAVE TO LIFT A FINGER TO SAVE BOTH ENERGY AND MONEY. SIMPLY RELEASE THE SINGLE LEVER AND IT WILL AUTOMATICALLY RETURN TO ITS ENERGY-EFFICIENT STARTING POINT.
3. OUR LIFT-OFF FUNCTION MAKES YOUR WC REALLY EASY TO CLEAN.
4. TO PROTECT IT AGAINST THE EFFECTS OF MOISTURE, THE ELECTRICAL SOCKET IS LOCATED INSIDE THE BATHROOM CABINET.

NEAT, EASY TO MAINTAIN AND ECO-SMART

The bathroom shown here is both neat and easy to maintain. It also helps save a lot of energy – automatically. Let's start by talking about the quiet, economy-flush Nautic WC, whose pure lines with few offset sections and joints make it easy to reach all areas when cleaning. The separate inner tank keeps the flush quiet and prevents condensation building up on the exterior. The flush button is ergonomically designed so that even children and people with reduced muscle strength can easily use it. And then we come to our award-winning Nautic mixer, whose unique energy-saving properties make sure that you never use more or hotter hot water than you actually need. Briefly put, Nautic is the most functional and eco-smart bathroom range we have ever produced.

NAUTIC BATHTUB MIXER WITH ROTARY SPOUT. LB BATHTUB WALL.

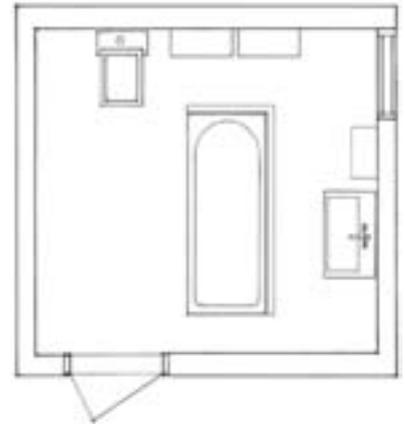

5. A GLASS SHOWER WALL RATHER THAN A SHOWER CURTAIN MAKES THE BATHROOM MORE ATTRACTIVE.

MEDIUM & MODERN

In normal size bathrooms, you have more space to work with. So it might be an idea to install storage cabinets that do not take up all the space in order to make room for a larger washbasin and washbasin cabinet. And how about having the furniture, mixer and bathtub in the same mood colour? Our trendy Crazy Orange shade is a big hit!

THE MIXER AND FURNITURE IN OUR NEW LOGIC RANGE FEATURE EXCHANGEABLE MIXER LEVERS, HANDLES AND DOOR PANELS IN A VARIETY OF MOOD COLOURS, WHICH MEANS THAT YOU CAN EASILY CHANGE THE IDENTITY OF YOUR BATHROOM.

LOGIC WASHBASIN CABINET 1890 WITH WASHBASIN AND DRAWER IN CRAZY ORANGE WITH HANDLE C. LOGIC WASHBASIN MIXER WITH LEVER IN CRAZY ORANGE.

SWEET AND SMART

Behind its mood-colour exterior, the Logic thermostatic mixer hides a range of features to ensure you always have an even flow of water. Another special feature is the hose connector, which is designed as a change-over selector. Simply pull the hose up to switch between shower and bath. The Logic thermostatic mixer has the same unique surface treatment as the washbasin mixer.

LOGIC BATHTUB MIXER WITH CRAZY ORANGE HANDLE. SKANDIC SHOWER HEAD AND SHOWER FITTING.

THE MOOD MIXER

There is nothing at all apologetic about the Logic mood mixer. It is shown here in Crazy Orange, but the Logic mixer, furniture and bathtub panels are available in a range of different mood colours. Timid traditionalists have nothing to fear, however, as the mixer is supplied in Classy Chrome as standard. In addition to Gustavsberg's patented energy-saving functions, the coloured lever on the Logic mixer features an auto-repairing and anti-bacterial surface coating.

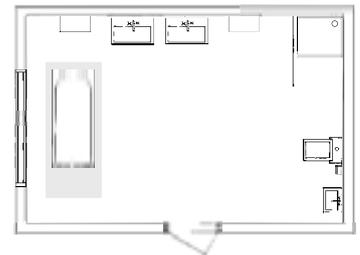

THE BATHTUB FRONT PANEL IS SIMPLE TO SLIDE UP TO FACILITATE CLEANING.

LARGE & GLAMOROUS

For those who really want to maximise their bathroom experience, this solution may be an excellent option. Logic furniture units from Gustavsberg are both elegant and functional and provide plenty of storage space. With twin washbasin cabinets, two tall cabinets, three washbasins, a wall-mounted WC, built-in bathtub and free-standing shower, several people can use this large, glamorous bathroom at the same time.

THE WASHBASIN CABINET IN OUR NEW WOODY GREY COLOUR PROVIDES SMART AND STYLISH STORAGE. SEVERAL HANDLE MODELS ARE AVAILABLE.

TILED IN BATH 1380 WITH RIM-MOUNTED THERMOSTATIC SKANDIC MIXER. LOGIC TALL CABINET 1871 WITH DOORS IN WOODY GREY AND HANDLE E128. 1880 60 MIRROR WITH ELECTRICAL SOCKET. MORE SPACE FOR CHAMPAGNE

Our built-in bathtub with the neat, rim-mounted mixer gives the bathroom a glamorous, authentic look, and provides plenty of space for Champagne glasses, for example ... In addition, it helps make the bathroom much easier to clean. Always take care to fit some kind of inspection hatch to provide access to the drain below the tub.

TILED-IN BATH 1380 WITH RIM-MOUNTED THERMOSTATIC SKANDIC MIXER.

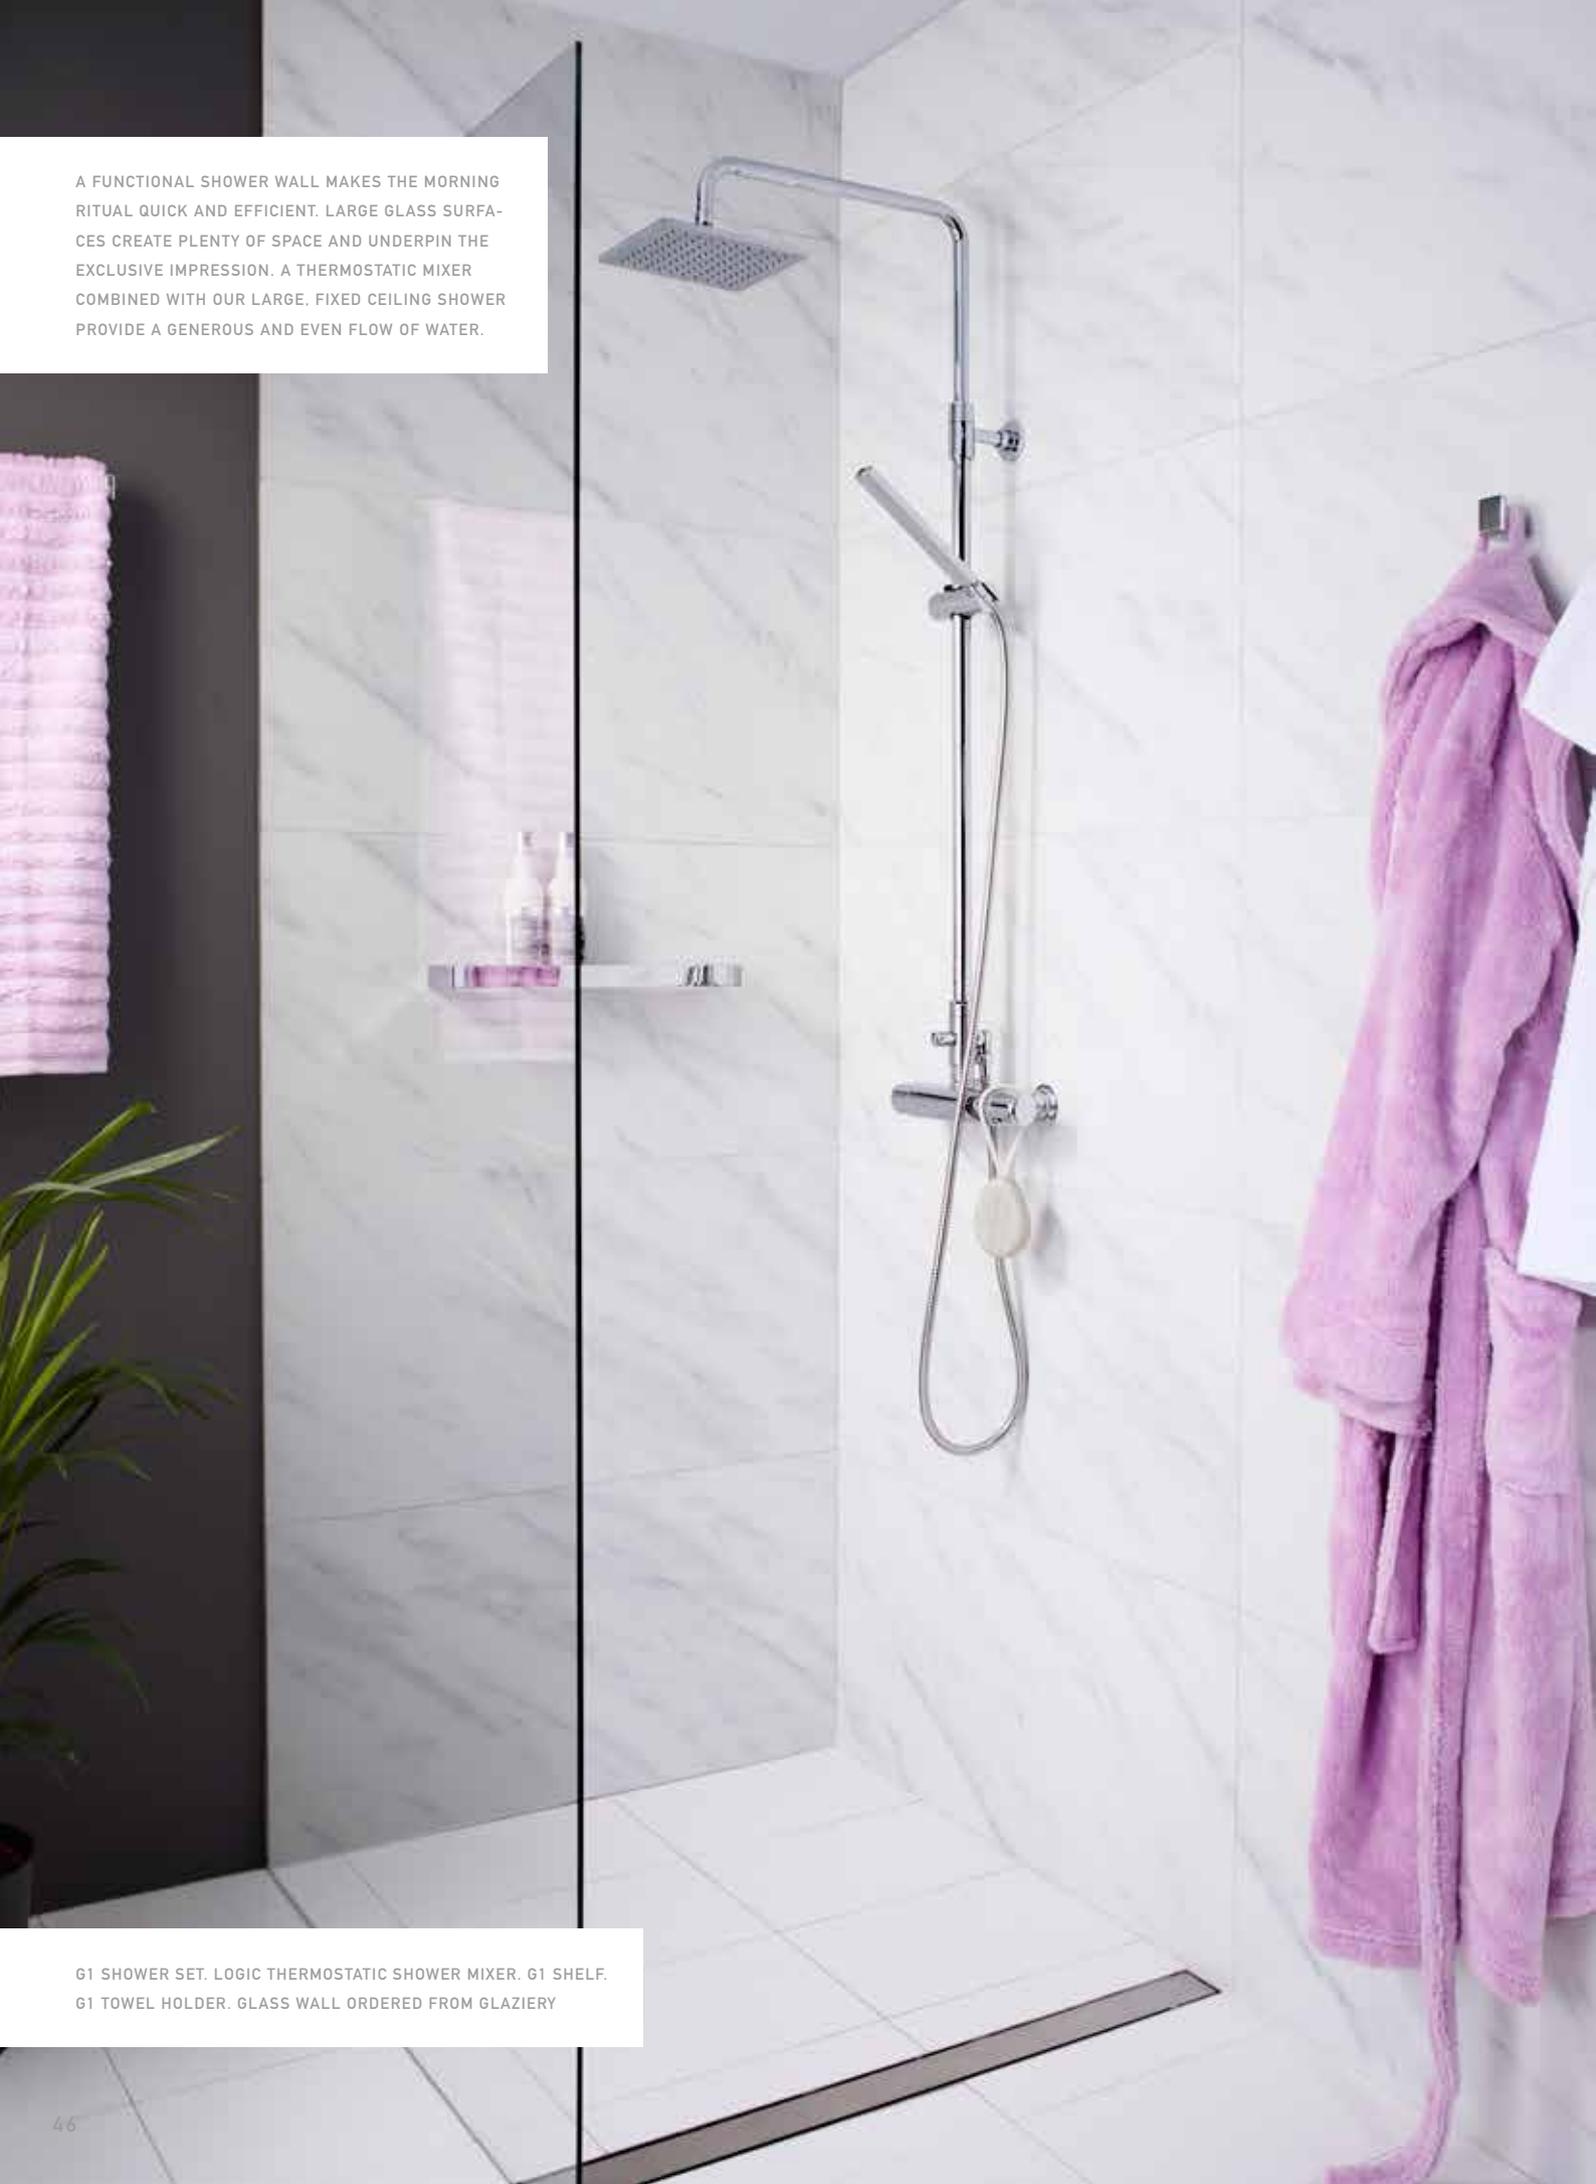

WALL-MOUNTED & WONDERFUL

Our wall-mounted porcelain products are not just practical from the perspective of cleaning, they are also attractive to look at. Note the WC's elegant white glass flush button, which is positioned on the wall. The seat is available in black and white, and closes silently thanks to soft-close functionality. The neat washbasin has been fitted with our de luxe, sensor-controlled mixer. All porcelain items are available with ceramicplus, an extra surface treatment.

SENSOR-CONTROLLED & ECO-SMART

The sensor-controlled Logic mixer turns on automatically when you place your hands in the appropriate position, and shuts off again as soon as you remove them. The neat Logic washbasin takes up little space but provides a surprisingly large surface area. The overall impression is neat, hygienic and eco-smart.

LOGIC SENSOR CONTROLLED WASHBASIN MIXER.

BEAUTIFUL FURNITURE IN WOODY GREY

Beautiful Logic furniture units in Woody Grey put the finishing touch to your bathroom, and on account of their chic, flexible design, they suit both large and small bathrooms. Where there is plenty of space, it is a good idea to double up the washbasin units and tall cabinets. The mirror cabinet features a tasteful lighting rack, and is available with or without an electrical socket.

1880 60 MIRROR WITH ELECTRICAL SOCKET. LOGIC WASH-BASIN CABINET 1862 WITH DOORS IN WOODY GREY FITTED WITH WASHBASIN AND HANDLE E128. LOGIC TALL CABINET 1871 WITH DOORS IN WOODY GREY AND HANDLE E128.

LARGE OPEN SPACES INSPIRE CREATIVITY. CANDLELIGHT CREATES INTIMACY.

SPA & MASSAGE

WHIRL YOURSELF FIT

Taking a whirlpool bath is not just a delightful experience – it is also documentedly good for your health. The bubbles raise your body temperature and stimulate both your circulation and your metabolism. The Gustavsberg massage system mixes air and water in a manner that provides more effective water circulation and a better massage than other systems.

1. THE WHIRLPOOL FUNCTIONS ARE SIMPLE TO CONTROL USING THE PANEL ON THE BATHTUB RIM. LED LIGHTING IN THE TUB SIGNIFICANTLY BOOSTS THE COMFORT FACTOR. **2.** A COMFY NECK SUPPORT AND SIX DIRECTED JETS ARE SHEER HEAVEN FOR TENDER BACK MUSCLES. **3.** THE NUMBER OF JETS AND THEIR POSITIONING VARY DEPENDING ON THE SYSTEM YOU CHOOSE. **4.** YOU CAN ALSO HAVE A HANDLE FITTED TO FACILITATE ENTERING AND LEAVING THE TUB.

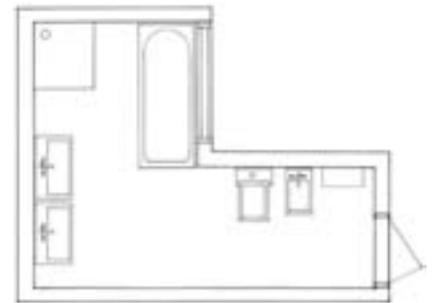

ARTIC TILED-IN ACRYLIC MESSAGE BATH FITTED WITH RIM-MOUNTED SKANDIC THERMOSTATIC MIXER, NECK CUSHION AND HANDLES.

LARGE & LUXURIOUS

For those who like to think big, here is the best of the best – the crème de la crème, à la Gustavsberg. The bathroom shown here requires a relatively large space and costs a little more. However, it allows you to install both a bathtub and a shower, a double washbasin and all kinds of storage options. In addition, many people really appreciate a very spacious bathroom. Which also looks absolutely delightful. Wouldn't you agree?

INSTALLED IN A DELIGHTFUL AND SPACIOUS NAUTIC CABINET. AS A FINISHING TOUCH, WE HAVE ADDED OUR BEAUTIFUL AND UNIQUE COLORIC MIXER, WHICH IS AVAILABLE IN A VARIETY OF LUXURIOUS COLOURS.

NAUTIC WASHBASIN CABINET A903 (60 CM) IN MATT GREY WITH BLACK DÉCOR PROFILES A672 60. NAUTIC TOP PANEL A664, MATT GREY (120 CM). MIRROR WITH LIGHTING A403 60. ARTIC WASHBASIN 4551. COLORIC THERMOSTATIC WASHBASIN MIXER. SINFUL BLACK. GLASS SHELF ORDERED FROM GLAZIERY

QUIET ELEGANCE

For the spacious bathroom, we recommend a wall-mounted WC and bidet with a hand-shower, both from our exclusive Artic range. The WC flushes quietly, and the flush button itself is available in a wide range of models and finishes. Free spaces, authentic materials and the pure lines of the Artic range combine to create a consistent sense of design. Both the WC and bidet are available with an extra protective surface coating – Ceramicplus – which prevents dirt from building up and thus facilitates cleaning.

THE NAUTIC FURNITURE UNITS ARE SUPPLIED AS STANDARD WITH A WHITE DÉCOR PROFILE. PROFILES IN ALUMINIUM, BLACK OR RED ARE AVAILABLE AS OPTIONAL EXTRAS. AND THEY ARE SIMPLE TO FIT. THE DÉCOR PROFILE COLOURS MATCH THE COLORIC MIXER COLOURS.

ARTIC WC 4330 WITH BLACK SEAT. TRIOMONT PNEUMATIC WALL MOUNTED CONTROL PANEL IN BLACK GLASS. ARTIC BIDET 4130. COLORIC BIDET MIXER, SINFUL BLACK, WITH SKANDIC SIDE-SHOWER AND WALL FITTING. G2 TOILET PAPER HOLDER. G2 TOWEL HANGER, RING.

LUXURIOUS DETAILS

The elevating hinge is a smart detail that lifts the shower door 5 mm every time you open and close it. This minimises wear on both the floor and the shower doors. A practical function that provides a sense of authentic luxury.

ARTIC: SOBER AND EXCLUSIVE

The beautiful new furniture units in our Artic range feature moveable drawer inserts for flexible storage solutions. Soft close technology ensures that drawers and doors shut silently. The distinguishing features of the porcelain items are straight lines, right angles and a modern touch that blends into a new environ-

ment or generates a powerful contrast in an older setting. The clean shapes are not just a treat for the eye: smooth surfaces conceal drain connections and water traps while making the products hygienic and easy to clean.

The Artic range includes: bathroom furniture in three different colours, mirrors with and without lighting, WCs and washbasins. Finish off with your choice of mixers, bathtub and shower to complete your bathroom. Some products from the Artic range are pictured below.

ARTIC FURNITURE IN BLACK OAK. ALSO AVAILABLE IN NATURAL OAK AND MATTE WHITE.

LOGIC: FLEXIBLE COLOURING

Logic adds colour to your bathroom. There are several mood colours and handles to choose between for the furniture, mixer levers and bathtub panels in the range – and all are simple to exchange. Logic also makes your bathroom bigger. Curvaceous shapes have

been scaled back to straight, fastidious lines. The products are chic and simple to fit into any bathroom – like pieces of a jigsaw. The furniture units are available in a variety of sizes, from small cassette cabinets to broad bottom cabinets with a shallower depth.

The Logic range includes: a wide variety of bathroom furniture units, a selection of washbasin models – from full-cover to small corner basins – a wall-mounted WC, and a mixer with exchangeable levers and handles in several colours. Supplement with a bathtub with a front panel frame in the same colour as the furniture and the mixers, or a shower in the model and size of your choice.

LOGIC: COULD YOUR BATHROOM USE A MOOD?

Logic from Gustavsberg is the first bathroom range that can reflect your mood. Let Moody Blue, Crazy Orange or one of our other four mood colours make your bathroom even more personal. As the mixer lever, the thermostat handle, the furniture panels and the

bathtub front are all exchangeable, you can let your mood decide the colour. And if you change your mind, no problem. Simply switch colours.

LOGIC WASHBASIN MIXER, CLASSY CHROME

MIXERS, FURNITURE UNITS AND BATHTUB PANELS ARE AVAILABLE IN FOUR MOOD COLOURS:

CRAZY ORANGE

PERFECT WHITE

NAUTIC: DESIGNED FOR YOU

We have created our Nautic range on the basis of impressions, experiences and wishes from the people who use our products on a daily basis, i.e. you. This has resulted in the most functional and eco-smart bathroom range we have ever produced. The design is organic and harmonious. The mixers in the range are packed

with smart functions that help save energy and make the mixers eco-friendly and safe to use. A bathroom furnished with Nautic products is unassuming, stylish, fresh and hygienic. Nautic is also our broadest product range and contains everything you need for your bathroom.

The Nautic range – our broadest range ever – contains bathroom furniture in white or sober grey, mirror cabinets, a variety of WCs and washbasins, as well as mixers for both kitchens and bathrooms.

ERGONOMICALLY DESIGNED

The flush button on the Nautic models is ergonomically simple to use and its function is clear to everyone. All users, even young children, can easily recognise the full and half-flush functionality, even in dim lighting. The button has been specially designed to make it particularly easy to use so that even children, people with reduced muscle strength or people with long nails can use it without difficulty.

COLORIC: THE EXPRESSIVE MIXER

Coloric is a little more eye-catching than other mixers. The model is available in five different colours to match your tiles or your towels – or to create an interesting contrast. Coloric makes a big

impression in the bathroom, but not so much of an impact on the environment. It is made of aluminium – a light metal that means more fuel-efficient transport – and completely recyclable.

The range includes mixers for both bathroom and kitchen, and a shower set. The colours are a perfect match for the décor profile in the Nautic range of bathroom furniture.

PUBLIC BATHROOM OF THE FINEST CALIBRE

The next time you happen to find yourself in a hospital, a school or some other public building, make sure to visit the bathroom. The chances are that you will spot the well-known Gustavsberg anchor symbol on the sanitary porcelain. The reason for this is that we are skilled in setting up public facilities, and have the products to match the tough demands that apply to such settings.

When it comes to hospitals, the demands on sanitary porcelain are extremely stringent from the perspectives of both hygiene and accessibility. Toilets, washbasins and mixers must all be easy to use for people with diminished mobility and muscle strength. They must be easily accessible, hygienic, simple to keep clean and – in particular – energy-saving.

FUNCTIONALLY ADAPTED MIXER

With an extended lever or larger handles, our mixer is easy for everyone – even people with reduced mobility – to use.

ULTRA-MODERN HOSPITAL CHOOSES GUSTAVSBERG

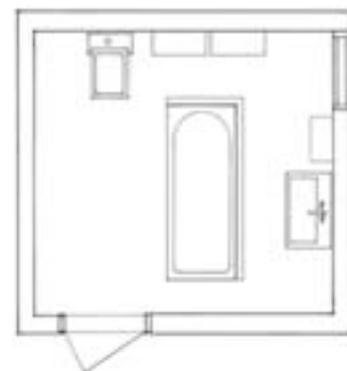

Gustavsberg recently won the prestigious commission to supply fittings to the most modern hospital in Europe: Nya Karolinska Solna. The emphasis here was very much on sustainability and environmental concerns. In collaboration with the client, we developed a completely new WC (Nautic 5522), which is designed specifically for hospitals. The space between wall and cistern makes it easy to keep clean. A closed cistern and glazed flush surface improve hygiene. The ergonomically raised button makes the toilet easy to flush, even for people with reduced muscle strength.

GUSTAVSBERG'S FUNCTIONALLY ADAPTED PRODUCTS ARE NOT RESERVED EXCLUSIVELY FOR HOSPITALS. THEY ARE ALSO JUST AS GOOD AT HOME FOR PROVIDING EXTRA SUPPORT.

BEFORE YOU START

1. Divide your bathroom into three functions: one for toilet visits, one for full-body care (i.e. baths and showers), and one for grooming – hands, teeth and face.
2. A large family may need a separate toilet. Is there some unutilised space in your home that would be suitable for a separate WC? A toilet in the same room can be separated off by installing a partition wall.
3. Do you want to fit a bath, a shower – or both – in your bathroom? The younger family members will probably monopolise the shower – so is there space to separate it off?
4. Base your ideas on the actual size of your bathroom and ask yourself: where can I change nappies? Where can I store the clean nappies? Do I need to make space for the washing machine and tumble dryer?
5. Remember the lights! Weak light – or excessively bright light – will make the bathroom environment dull and sad. A good rule of thumb is to have at least one light for “general lighting” and one directed light for “face work”. Include mirrors in your considerations; they reflect light and increase the sense of space in the room.
6. If the drain installations need to be moved, are the ones for the WC and washbasin to be installed in the wall or the floor? You can install wall-mounted porcelain even though the existing drain connections are in the floor.
7. Ventilation is important. Good ventilation – ideally combined with under-floor heating – helps the bathroom to dry quickly and reduces the risk of moisture damage.
8. The preparatory work beneath the floor and behind the walls – i.e. the work involving the pipes – is crucial in preventing moisture damage. We strongly recommend that you engage professionals for this work.
9. Light colours make the bathroom seem bigger. They also make dust, soap marks and water splashes less obvious.

CONSULT A PROFESSIONAL IF YOU WANT TO REMODEL YOUR EXISTING BATHROOM OR BUILD A NEW BATHROOM FROM SCRATCH. IT IS BEST TO REACH AGREEMENT AT THE DRAWING BOARD STAGE.

THE BIG CHECKLIST

Your choice of products is crucial when you are creating a bathroom to thrive in for many years. Once you have the answers to all the questions and considerations in this list, all that remains to do is to start work on the renovation. A number of processes have to be carried out by professionals. Do not “chance it” yourself – it could cost you dear. Our product range documentation provides detailed information.

BATHTUBS

Big or small? Built-in or free-standing? Enamel or acrylic? In this catalogue you will find all kinds of standard bathtubs from Gustavsberg, as well as a wide variety of whirlpool bathtubs.

BIDET

Unfortunately, when bathrooms are renovated, the bidet is often the first thing to go. But there is nothing better for taking care of intimate hygiene. If you think that it would “steal” space, why not choose a washbasin mixer with a separate hand shower that you can then use while sitting on the toilet?

MIXER

A mixer should be nice to look at – but it is the inside that makes the real difference. So go for quality. At Gustavsberg, you will find energy and water-saving technology in even the most exquisitely designed mixers. Do you have young children? Then choose a thermostatic mixer that regulates the water temperature and eliminates the risk of scalding.

SHOWER

Make sure that the walls and floor of your shower area are made of materials that are suitable for wetroom environments. This determines whether you can use shower walls or need a shower cabin. Then there are a lot of options to consider. In small bathrooms, a shower corner with a door that also opens inwards is a good solution.

STORAGE

Shelves or cabinets? Cabinets keep the dust off and help you to avoid having to look at all the packages and other things you need close at hand. However, shelves provide greater accessibility and allow you to display the items you enjoy looking at. Whatever you choose, make sure to include a lot of storage space – even if your bathroom is small. For example, there is almost always room for a cabinet under the washbasin.

DISABLED PEOPLE

It may be that you need to think about setting up your bathroom with an eye to the future – to the time when you may not be as

mobile as you once were. It is often the small details that make the bathroom much safer: a support rail by the bathtub and a non-slip surface on the bath-tub floor, for example. Or perhaps a support rail by the WC or a raised WC seat. An extended lever on a standard mixer or an sensor-controlled mixer will also make things easier for people with reduced hand strength. Our range contains numerous products that have been adapted for both children and adults with special needs. For more information about these products, visit www.gustavsberg.com

WASHBASIN

Installing two washbasins cuts down on queuing – and generates a sense of togetherness – for large families. Think about whether you want to conceal the water trap in a bottom cabinet or behind a pedestal or cover. If a standard size washbasin takes up too much space, there are smaller models and washbasins designed for corner installation to choose from. Our Logic range is designed precisely to free up space.

ACCESSORIES

Gustavsberg supplies a well thought-out selection of accessories. Always go for quality that lasts and design that you will enjoy for years and years. And make sure to seal all holes and cavities in bathroom walls thoroughly with silicone.

WC

Which model suits you best? Do you want the water trap concealed or visible? Do you prefer wall or floor-mounting? If your home is to have two toilets, why not choose different seat heights?

INSTALLATION

YOU CAN INSTALL MOST OF THE PRODUCTS YOURSELF. HOWEVER, THIS SYMBOL MEANS THAT WE RECOMMEND THAT YOU CONSULT A SKILLED PROFESSIONAL, SUCH AS A PLUMBER, A TILER OR AN ELECTRICIAN.

INNOVATIONS FROM GUSTAVSBERG

This timeline presents the innovations introduced by Gustavsberg over the years. From the foundation of the old brickworks back in the mid-1600s, via domestic porcelain, WCs, mixers, showers and bathtubs, and on to the porcelain factory planned for the future. Actually, Gustavsberg has launched so many innovations during its history that there is not enough room to list all the smart solutions, improvements, etc. in this catalogue. For the full timeline, visit www.gustavsberg.com

THE 1600S

THE OLD BRICKWORKS

In the mid-1600s, Gustav Gabrielsson Oxenstierna and his wife Maria de la Gardie inherit two freehold farms and a number of other Värmdö farms from the crown. Brick was needed to build a robust, sturdy home so they set up a brickworks by the bay in farsta. Gustav Gabrielsson Oxenstierna died before the house was completed and to honour his memory, Maria de la Gardie changed the name of the property to Gustavsberg.

1840-1850

THE PORCELAIN ACHIEVES INTERNATIONAL RECOGNITION

The manufacture of porcelain takes off, and Gustavsberg becomes something of a pioneer in its field, winning a variety of international awards. By nurturing the artistic talents of the age, the business lays the foundations for the artistic tradition that Gustavsberg will later develop even further.

1939

NEW FACTORY FOR SANITARY PORCELAIN OPENED

Gustavsberg's new factory for sanitary porcelain is officially opened. The factory was delivered by the Berlin oven manufacturer Kera-bedarf as a turnkey installation comprising new machinery and buildings.

1940-TALET

WASHBASINS FOR SINGLE-HOLE MIXERS

Gustavsberg introduces the first washbasin designed for the new single-hole mixers, which eliminate the need for separate taps for hot and cold water.

1949

WC 307

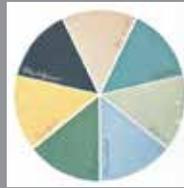

WC 307 features a significantly improved flushing effect compared to the old 306 model as the bowl walls are almost vertical and the flush mechanism features a new, quick-close floater valve. Design: Eric Svensson.

1957

COLOUR MOVES INTO THE BATHROOM

Gustavsberg plays the role of pioneer, bringing colour to the bathroom. As early as the 1950s, the Gustavsberg bathroom range features no fewer than eight colours. Even the bathtub is available in different shades.

1964

THE FIRST QUIET ONE

Gustavsberg launches a special quiet-flush wc – the 315t with mechanical components designed by Bertil Dahllöf. At the same time, the porcelain design is given a make-over by Gustavsberg's first industrial designer: Jan Landqvist.

1825

PORCELAIN MANUFACTURE COMMENCED

The 200-year-old brickworks is closed, and in 1825, the owner of national board of trade is commissioned to "establish and operate a factory for miscellaneous porcelain". Around the middle of the 1800s, Gustavsberg starts to manufacture its own products in English style, and to mark the change, the now-familiar anchor stamp is introduced in 1839. For more than 100 years, Gustavsberg primarily concentrates on making household porcelain and decorative items. Under the leadership of proprietor Wilhelm Odelberg, the foundations are laid for the major company that Gustavsberg will become at the end of the century.

1920

THE VÄRGÅRDA MIXER IS BORN

In 1920, elsewhere in Sweden, Gustav Hedblom is laying plans to open his own factory to manufacture taps. The idea increasingly occupies his thoughts and he soon decides to put his plan into action with the support of two friends. The Vårgårda mixer is born. By 1922, the company has expanded to employ 38 people, and it is with pride that they present a fine range of products and sales totalling SEK 66,550.

1940

WC 306

Gustavsberg introduces its first low-flush wc: model 306. Axel Nilsson's unique design is awarded a patent in 1940. Design: Carl Emil Benda.

1947

BATHTUB MANUFACTURE COMMENCES

The first Gustavsberg bathtub is unveiled on new year's eve 1947. It is the fruit of a unique partnership between Gustavsberg and the American automotive industry. The new form-pressed steel bathtub is easier to handle than the previous heavy and clumsy cast iron tubs. The Gustavsberg bathtub soon comes to dominate the market.

THE 1950S

DESIGNER WASHBASIN

It is in the 1950s that design finally moves into the bathroom. Gustavsberg had succeeded in attracting star designers Wilhelm Kåge and Stig Lindberg. Despite his unwillingness to adapt his models to standard dimensions and production conditions, Stig Lindberg still succeeded in developing a couple of washbasins.

1961

THE REMOVABLE WC SEAT

The removable wc seat makes cleaning easier. The product development project led by Bertil Dahllöf was rewarded with the 1961 plastic prize. With designers Stig Lindberg, Peter Pien and Carl-Arne Bregger, Gustavsberg creates a plastic profile in the 1960s that is just as highly rated as the company's porcelain.

THE 1980S

THE FIRST WATER-SAVING MIXER IN THE WORLD

Gustavsberg develops unique water-saving technology for its single-lever mixers, which results in a global patent. The design is as simple as it is brilliant. The mixer is fitted with a flow stop, which ensures that users never use more water than necessary. Thanks to this system, users save vast amounts of water over the course of a year, which means both lower operating costs and less environmental impact. The water-saving mixers become a huge export success.

ENAMELLED SHEET STEEL

The bathtub factory now also manufactures decorative items, signs and cladding panels in enamelled sheet steel, e.g. the signs for the Vasaloppet ski race.

1974 OIL CRISIS FORCES NEW SOLUTIONS

As a result of the oil crisis in 1974, people start to become seriously interested in energy-saving measures. Gustavsberg launches a new shower cabin for people who do not have space for a bathtub.

1974 WATER-SAVING TOILETS

Gustavsberg has now succeeded in developing four different water-saving wc systems: the bioloop that uses no water at all, the vacuum toilet that uses just 1.2 litres of water, a toilet for connection to a tank that uses 3.5 litres, and the standard model 315 that uses 6 litres instead of the previous 9.

1965 THE READY-TO-INSTALL BATHTUB

At around the same time as "the first quiet one" is launched, Gustavsberg makes another giant leap on the bathroom market in the form of the ready-to-install bathtub. The tub is stackable for easier delivery and features adjustable feet and a complete bottom valve unit with drain pipe. At the same time, it is a decimetre lower, to make it easier to enter and exit – and to cover the needs of elderly users and people with disabilities.

1993 NORDIC 390

Nordic 390 finally appears sixteen years after Gustavsberg launched its first standard range. One of many innovations in the new Nordic range is the replacement of the porcelain cistern cover with a plastic one. The porcelain cover has been discontinued for two reasons: because the manufacturing process is very time-consuming, and because the covers are made to match specific cisterns – which makes it very difficult to replace them if they are damaged. The new washbasin is designed for installation using bolts and brackets. This makes the manufacturing process more cost-efficient and helps broaden the range.

2009 SYSTEM VATETTE CUTS WATER DAMAGE

With system Vatette, Gustavsberg introduces a new installation system that significantly reduces the risk of water damage. This is made possible by the use of a neat fixture system that involves no screws at all. As such, there is only a minimal risk of moisture penetrating the sealant layer.

2011 TRIOMONT SYSTEM FOR WALL-MOUNTED WCS AND WASHBASINS

Triomont is a smart system for wall-mounted wcs and washbasins. It suits most bathrooms, eliminates major renovation work and allows the installation of wall-mounted bathroom products with a minimum of lost surface area. All that is required is a 14 cm recess.

2014 OFFICIAL OPENING OF GUSTAVSBERG'S NEW FACTORY

Gustavsberg started manufacturing sanitary porcelain back in 1939 in a new and (for the time) ultra-modern porcelain factory. Even though the company has reinvented itself continuously over the years, developing into something of a role model as regards eco-friendliness, there is little doubt that it is time for Gustavsberg to move to new and more appropriate premises. The new factory building is scheduled for completion in 2014.

THE 1970S NEW COLOUR SCHEME

Gustavsberg starts to make washbasins of enamelled sheet steel and begins to introduce new, strong and clear colours. The porcelain range has long been dominated by soft pastel shades, but in 1974 Gustavsberg unleashes three new colours for sanitary units: golden brown, olive green and chestnut.

1975 WASHBASIN 5080

Manufacturing large washbasins in porcelain leads to a rise in the level of rejects as the material has a tendency to curl during firing. Washbasin 5080 is made of enamelled sheet metal for Huddinge Hospital.

1992 DOUBLE SAVING FUNCTIONS IN THE MIXERS

For the past decade, Gustavsberg mixers have featured globally patented water-saving technology. The company now adds energy-saving technology as well. The energy-saving properties of the new mixer soon prove to be almost incredible, and the effect can be compared to swapping a standard car for an eco-friendly model. The real difference is that the mixer is appreciably cheaper.

2000 GUSTAVSBERG CELEBRATES ITS 175TH ANNIVERSARY WITH A NEW RANGE

The start of the new millennium coincides with Gustavsberg's 175th anniversary as a porcelain manufacturer. To celebrate the event, the company develops an anniversary range: Classic. The inspiration for this range with its functional aesthetics has been drawn from Gustavsberg's predecessor from the 1940s. Design: Rolf Ling

... AND IS ENVIRONMENTALLY CERTIFIED

The Gustavsberg factory was quick to install its own purification plant, and the factory floors are washed with water from a private lake. In addition; excess heat from the ovens is used to heat the premises. On the back of this assiduous environmental work, Gustavsberg is awarded environmental certification in 2000.

2010 NAUTIC: DESIGNED BY YOU

Function and design have always gone hand in hand at Gustavsberg. The Nautic range makes additional leaps in the area as both fitters and consumers are invited to participate in the design process. The Nautic range becomes Gustavsberg's most functional bathroom range ever, packed with technological finesses that make life easier for both users and fitters. Nautic replaces the Nordic 2002 standard range. Design: Myra industriell design led by Peter Nordgren.

2012 AN EXCHANGEABLE WORLD-FIRST WITH A MOOD

The Logic range is updated with mixers for washbasins, showers, baths and kitchens. In addition to saving energy and water, the new mixers can even change colour. The mixer handles are available in four different mood colours – as are the furniture unit doors and the bathtub front panels. The unique exchangeable aspect makes the bathroom more personal. Design: Jon Eliasson.

”GOOD DESIGN TAKES THE ENTIRE PROCESS INTO CONSIDERATION”

JON ELIASSON DESIGNER

I usually choose to work on the basis of one of the three following design processes. The first category is “art design”. This can be compared to a qualified form of navel gazing, which, unfortunately, seldom sells well. Then comes standard design, which involves creating a product on the basis of a need. The third category is pure design, which involves considering in advance all the aspects of the process, such as manufacturing, choice of material, costs, target group and packaging.

In my opinion, Gustavsberg has always been associated with quality, and having the opportunity to work with them was a childhood dream come true. After all, I grew up with this classic company, so it felt like being given the chance to play football with your idol. To date, I have designed bathtub panels, hooks and mixers for the Coloric and Logic ranges. I was also involved in the work to prepare the new mood colours, where we drew inspiration from earlier Gustavsberg products from different eras.

”NEW PRODUCTS ALMOST ALWAYS STEM FROM AN ACTUAL NEED”

CECILIA NYBERG PRODUCT MANAGER, BATHTUBS, SHOWERS AND FURNITURE

For us at Gustavsberg, it is almost always the case that it is the customer who defines what we are to make and how it is to be designed. When we noted that there was a need for handles on bathtubs, we put the handles you wanted on our bathtubs. Our new Logic bathroom range was also created on the basis of customer needs – in this case, it had to do with making the bathroom more personal. That is why the logic panels for drawers and cabinets are exchangeable and available in different colours. Even the lever on the mixers is exchangeable. This means that when you tire of black, for example, you can simply choose another colour. The ability to supply a bathroom that can change its identity according to your mood and personality is actually something unique to us at Gustavsberg. Thanks to all our smart customers, of course.

HOW SMART IS YOUR WC?

The Gustavsberg porcelain factory can trace its roots back to the 1600s, and we have been making WCs since 1939. In fact, for many people in Sweden, the word "toilet" or "WC" is synonymous with Gustavsberg. This is probably because we have been around for so long that we have quite simply become a natural part of people's everyday lives. Today, Gustavsberg is at the cutting edge interna-

tionally as regards water-saving solutions for WCs. We have added even more smart functions to our latest models to make your day-to-day life even easier. Without having a negative impact on the environment, of course. You could say that we have developed our WCs from smart to eco-smart.

ECO-SMART SOLUTIONS

All our WC models feature water-saving technology – smart eco-friendly solutions that will also benefit your wallet. With Ceramicplus surface treatment, the porcelain will be even easier to clean and the need to use strong cleaning agents will be appreciably reduced. Which is good news for the environment.

MANY OF OUR PRODUCTS ARE AVAILABLE WITH CERAMICPLUS (C+) SURFACE TREATMENT. THIS PROVIDES THE PORCELAIN WITH A DIRT-REPELLENT SURFACE THAT PREVENTS THE ACCUMULATION OF LIMESCALE AND DIRT. C+ IS ALSO GOOD FOR THE ENVIRONMENT, AS IT MEANS THAT YOU CAN USE A Milder DETERGENT – AND LESS OF IT! – WHEN CLEANING.

THE QUICK RELEASE FUNCTION MAKES IT SIMPLE TO REMOVE THE SEAT FROM THE WC WITHOUT USING TOOLS. THE SEAT AND TOILET CAN THEN BE CLEANED SEPARATELY, WHICH IS BOTH EASIER AND MORE HYGIENIC.

HARD, AUTHENTIC TOILET SEATS HAVE PREVIOUSLY BEEN ASSOCIATED WITH LOUD NOISES WHEN THEY ARE LOWERED. SOFT CLOSE FUNCTIONALITY HAS SOLVED THIS PROBLEM THROUGH THE INTRODUCTION OF A DAMPER BUILT INTO THE SEAT TO ENSURE THAT IT CAN BE LOWERED GENTLY AND QUIETLY. THE DAMPER DOES NOT MAKE DIRECT CONTACT WITH THE PORCELAIN, WHICH FACILITATES CLEANING AND MAKES THE SEAT MORE HYGIENIC.

YOU CAN INSTALL MOST OF THE PRODUCTS YOURSELF. HOWEVER, THIS SYMBOL MEANS THAT WE RECOMMEND THAT YOU CONSULT A SKILLED PROFESSIONAL, SUCH AS A PLUMBER, A TILER OR AN ELECTRICIAN.

INDEPENDENT CERTIFICATION

The Nordic Quality symbol is allocated to certified sanitation products in line with established requirements controlled by INSTA-CERT. These products meet set criteria for production, guarantee period, spare parts, documentation and technical suitability for installation in the Nordic region.

GOOD TO KNOW ...

- All Gustavsberg WCs and bidets are made of tightly vitrified sanitary porcelain – the most hygienic and durable material for bathroom fittings. This ensures a strong, durable surface. Year after year.
- We manufacture our WCs in line with stringent environmental requirements that cover the development of material and function, production, transport and delivery, for example.
- Our manufacturing process has been certified in accordance with the ISO 9000 standard.
- Both wall-mounted and floor-mounted models of WCs and bidets are available.
- Most of our WC models feature a double flush function which can help reduce water consumption by up to 50 per cent. However, a single flush involving more water may sometimes be necessary to rinse the pipes – if the drain pipes in your home are old, for example.
- Choose between several seat options. It is important to choose a seat that suits the WC model you have selected from the perspectives of both design and ergonomics.

IMPORTANT CONCEPTS

The following pages list various installation options that may need a little explanation:

Concealed S-trap: built-in drain pipe for floor-based connections. The drain connection is concealed but not built-in.

P-trap: also known as the “universal model”. Features a horizontal outflow pipe that allows great connection flexibility: floor connection, wall connection, right-hand side and left-hand side.

Wall mounting: If you decide to fit your WC or bidet to the wall, you must make sure that the fittings can handle the load. The Gustavsberg range includes thoroughly tested fixtures for fitting WCs and bidets to light walls. It is possible to install a wall-mounted WC in most cases, even though you may currently have a floor-mounted model. Take a look at our flexible, easy-to-install Triomont system elsewhere in this catalogue.

Glue fitting: Most often, WCs are bolted to the floor, but it is also possible to fix them in place with glue or wet room silicone. This is an excellent solution if you do not want to run the risk of the bolts puncturing underfloor heating pipes, for example. Always consult your dealer about the correct type of glue/silicone for your floor surface.

WHERE DO YOU WANT TO HANG YOUR WC?

Triomont is the smartest system on the market for wall-mounted WCs and washbasins, and it suits most bathrooms. Ugly pipes that attract dust and dirt are concealed behind a niche that also doubles as a practical shelf surface. You can decide the design of this niche yourself. For example, would you prefer glass or wood? Or even a fully tiled solution? The Gustavsberg Triomont system can be installed in corners and small spaces to maximise the floor

area of your bathroom and help you avoid costly remodelling. In addition, it is extremely easy to install. With Triomont, you can choose from a variety of high-quality WC models, washbasins, mixers and flush buttons from both Gustavsberg and Villeroy & Boch. That explains why Triomont is the smartest system for bathrooms on the market. So only one question remains: where do you want to hang your WC?

IT'S AS SIMPLE AS THAT

The Triomont fixture suits most bathrooms and helps avoid large and costly remodelling. All you actually need is a 14 cm recess, which is the floor space that the fixture requires. As such, it takes up no more space than a floor-mounted WC.

The pictures on these pages show what the neat but powerful Triomont fixture looks like at every stage from initial installation to final result. Neat, decorative and relatively simple.

You can install most of our products yourself, but we recommend that you call on a professional fitter to help you with WC fixtures as special regulations apply to wet room environments. If you want to do the work yourself, you should still consult a professional before you start. Contact your dealer, plumber or a DIY store.

You can also watch our instruction video online at www.gustavsberg.com.

NAUTIC WASHBASIN 5556. NAUTIC WASHBASIN MIXER. WATER TRAP 3880. NAUTIC WC 5530 WITH HARD SEAT. TRIOMONT PNEUMATIC FLUSH BUTTON. G1 PAPER HOLDER. G1 HOOK.

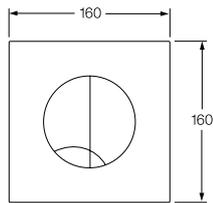

FLUSH NEATLY. FLUSH SMARTLY.

You can choose between wall-mounted and top-mounted flush buttons, and there is even a pneumatic model. The push button you choose determines whether you can use single or dual-flush functionality.

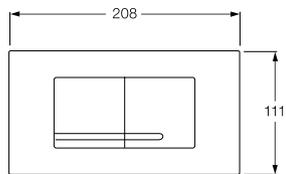

1 Wall-mounted button

Mechanical or pneumatic push button for placing in a fixed position on the wall above the bowl.

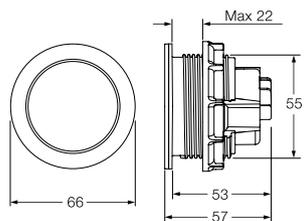

2 Top-mounted button

Mechanical or pneumatic push button for placing in a fixed position on top of a half-wall.

3 Pneumatic flush button

Air-controlled single-flush button that you can position anywhere within 1.5 m of the fixture.

GOOD TO KNOW ABOUT TRIOMONT

Triomont is a simple and flexible system, both for the fitters and for the people who use the bathroom. The design and all the materials are of the highest quality. It meets the most stringent test requirements for load bearing: 400 kg. In other words, you need not worry about whether the construction will take your weight.

PUSH BUTTONS

Push buttons in a variety of models and materials make it easy for you to find a style that matches your taste and bathroom layout. There are push buttons for wall or top-mounting, and for single and double flush solutions. You can even choose between buttons for mechanical or pneumatic flushing. The pneumatic solution allows you to place the button anywhere you like near your WC – as long as it is no more than 1.5 metres away.

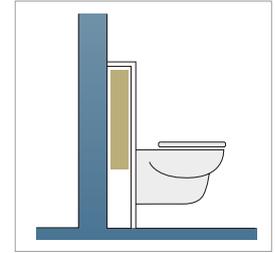

TOILET BOWLS

All WCs from Gustavsberg can be combined with the Triomont WC fixtures. The distance between the bolts for fixing the WC in place is 180 or 230 mm to accommodate different types. As Gustavsberg is a part of Villeroy & Boch, you can also choose from this company's range of WCs. If you set the distance between the bolts to 180 mm, you can use all WC models from Gustavsberg and Villeroy & Boch. There are models to suit everyone: children, tall people, short people, heavily built people, and people with special needs. There are large and small models. There are models for corner installations and small spaces. And all the models match the Triomont fixtures from Gustavsberg – of course.

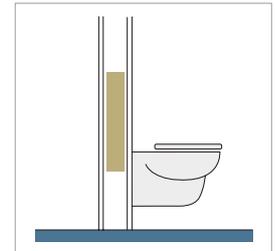

WASHBASIN

The adjustable washbasin fixture can be used for all washbasins with a centre-to-centre bolt distance of up to 280 mm. The advantage of this solution is that it conceals all water and drain pipes.

YOU CAN ALSO CHOOSE TOILET BOWLS FROM VILLEROY & BOCH

Since 2000, Gustavsberg has been owned by Villeroy & Boch – one of the leading manufacturers of bathroom products in Europe. On the following pages, we present a selection of the Villeroy & Boch toilet bowls that can be used with the Triomont fixtures. The different models are intended for different areas of use. It may well be that you find one that matches your needs exactly. All Villeroy & Boch bowls are designed for mounting with a centre to centre distance between bolts of 180 mm.

To view even more toilet bowls or the entire range of Villeroy & Boch bathroom products, contact us or visit www.villeroy-boch.com.

Villeroy & Boch owns Gustavsberg, which gives you the opportunity to combine these two “bathroom worlds”. Simply put, you can choose the Triomont solution from Gustavsberg and then select a WC bowl from Villeroy & Boch. We are sure that you will find just what you are looking for.

VILLEROY & BOCH WC BOWLS

- All WC bowls can be combined with Triomont fixtures.
- All Villeroy & Boch WC bowls are for fitting with a centre to centre measurement of 180 mm.
- Broad range that covers many special needs.
- Load tested to 400 kg.
- Multiple seat options.
- C+ as an option for simple and eco-friendly cleaning.

WHICH WASHBASIN WILL YOU CHOOSE?

We are spending more and more time in our bathrooms, and the washbasin is perhaps the bathroom element we visit most times each day. It is here that we brush our teeth, wash our hands, rinse our mouths and so on. That is why it is important to choose a washbasin whose design makes the best possible use of the (often limited) space in the bathroom, and which can provide practical

flat surfaces. In addition, it should be easy to look after and aesthetically attractive. Gustavsberg supplies a wide range of washbasins to cover every need and taste imaginable. Here you can see examples from three of our ranges, which comprise a variety of different models and designs.

HIGH QUALITY AND A BROAD RANGE

A trait shared by all Gustavsberg washbasin models is the consistently high quality of the porcelain. A good washbasin should be simple to keep clean, stay looking fresh and last for years and years. The design is also important, of course. We supply a wide range of models in various sizes, so you are sure to find something to match your aesthetic preferences and the physical appearance of your bathroom. No matter whether you are looking for a small, large, luxurious or functional bathroom, Gustavsberg has a comprehensive selection of washbasins for you to choose from.

As the name suggests, a "sub-mounted" washbasin is fitted below the worktop, in which holes are cut for the basin and the associated mixer. Naturally, it is important to select a worktop that can withstand the effects of water.

SUITS ALL BATHROOMS

Many Gustavsberg washbasins are designed for recessing into associated furniture units – known as washbasin cabinets. The contrast with the furniture unit highlights the beauty of the porcelain. The Logic range has been produced especially for small bathrooms, with some washbasins designed specifically for corner installation. Our Nautic range has been designed to be extra-functional. The clean, neat lines and rounded edges of the porcelain units save space and facilitate cleaning. The angular shapes of the Artic range constitute washbasin art of the highest calibre.

LOGIC WASHBASIN

The Logic range features smart models for small bathrooms.

STYLISH DETAILS

Stylish water traps, washbasin pedestals and covers beautify even the most obscure places in the bathroom.

WASHBASIN WITH WATER TRAP

Really small washbasins do not have room for a pedestal or bottom cabinet. For these, a neat water trap can be the perfect solution. Of course, a neat water trap will suit our larger washbasins, too. Models are available for both wall and floor connection.

NAUTIC COVER

The stylish Nautic cover in porcelain neatly conceals the wall-connected drain and water trap. If you have a floor-connected drain, simply choose a porcelain pedestal instead.

MANY OF OUR PRODUCTS ARE AVAILABLE WITH C+ SURFACE TREATMENT. THIS PROVIDES THE PORCELAIN WITH A DIRT-REPELLENT SURFACE THAT PREVENTS THE ACCUMULATION OF LIMESCALE AND DIRT. C+ IS ALSO GOOD FOR THE ENVIRONMENT, AS IT MEANS THAT YOU CAN USE A Milder DETERGENT – AND LESS OF IT! – WHEN CLEANING.

YOU CAN INSTALL MOST OF THE PRODUCTS YOURSELF. HOWEVER, THIS SYMBOL MEANS THAT WE RECOMMEND THAT YOU CONSULT A SKILLED PROFESSIONAL, SUCH AS A PLUMBER, A TILER OR AN ELECTRICIAN.

GOOD TO KNOW

- All our washbasins are made of closely vitrified sanitary porcelain – the most hygienic and durable material for bathroom fittings. This ensures a strong, durable surface. Year after year.
- We manufacture our washbasins in line with stringent environmental requirements that cover the development of material and function, production, transport and delivery, for example.
- Our manufacturing process has been certified in accordance with the ISO 9000 standard.
- Covers or pedestals to hide pipes and water traps are available as accessories for several ranges. You must always fit pedestals at the same time as the washbasin to ensure the neatest installation.
- Cabinets for fitting below washbasins provide valuable storage space in the bathroom without diminishing the floor space.

IMPORTANT CONCEPTS

The following pages present a variety of fitting options which may need a little more explanation:

To fit a washbasin on brackets, start by mounting the brackets on the wall and then hang the washbasin on them. With this solution, you can choose to leave space between the washbasin and the wall. To fit a washbasin with bolts, simply bolt the washbasin directly onto the wall. This method leaves no gap between the washbasin and the wall. Make sure that the wall has been sufficiently reinforced to accommodate the type of installation you choose.

Two installation options are available for washbasins for fitting in **bench tops**. “**Built-in**” basins are fitted from above in a bench top with an appropriate cut-out. “**For sub-mounting**” models are fitted below bench tops that have holes milled for the basin and mixer.

NAUTIC WASHBASINS

- Easy-to-clean, minimalistic design in a range of sizes, 40–70 cm
- Elliptical basin with generous flat surfaces
- C+ as an option for simple and eco-friendly cleaning
- For bolt or bracket installation

HOW DO YOU FURNISH YOUR BATHROOM?

Bathrooms often tend to become cluttered up with all kinds of things. Towels, shampoo bottles, hair brushes, bath robes, make-up, toilet paper, toothpaste tubes, medicines ... everything piles up in a limited area. One effective way to deal with the chaos

is to make sure that you have plenty of storage space. Gustavsberg bathroom furniture is your key to a flexible and functional storage solution, presented with true finesse.

LOGIC BATHROOM FURNITURE
Woody Grey

FLEXIBLE FURNITURE WITH FINESSE

With a washbasin cabinet, a tall cabinet and a front-lit mirror cabinet, you will have plenty of space for all your bathroom items. Thanks to their flexible design, Logic furniture units suit both large and small bathrooms. Where there is plenty of space, it is a good idea to double up the washbasin units and tall cabinets. All Logic units feature white cabinet frames, but the doors and drawer fronts are available in a variety of colours and finishes.

EXCLUSIVE AND AUTHENTIC

New this year are the brilliant and elegant furniture units from the Artic range. The softly closing doors, neat, moveable modular sections and well thought-out mirror cabinets are designed to add a whole new dimension to your bathroom experience. The washbasin cabinet, tall and wall cabinets are available in Black Oak, Natural Oak and Matte White finishes. Our Artic furniture is sure to give your bathroom an authentic, exclusive atmosphere.

SMART AND TASTEFUL

Beautiful Gustavsberg porcelain recessed into a dark washbasin cabinet is more than just a treat for the eyes. The combination also provides plenty of surface space along with a smart storage solution.

THE ACOUSTICS IN A BATHROOM CAN RESULT IN LOUD, SUDDEN NOISES BEING PARTICULARLY IRRITATING. THE SOFT-CLOSE SYSTEM ENSURES THAT CABINET DOORS AND DRAWERS CLOSE SOFTLY AND SILENTLY.

YOU CAN INSTALL MOST OF THE PRODUCTS YOURSELF. HOWEVER, THIS SYMBOL MEANS THAT WE RECOMMEND THAT YOU CONSULT A SKILLED PROFESSIONAL, SUCH AS A PLUMBER, A TILER OR AN ELECTRICIAN.

GOOD TO KNOW ...

- You can combine furniture and bathroom porcelain any way you want to, but remember that washbasins with washbasin cabinets are always designed to fit each other. Make sure that the dimensions match when making your choice.
- You can choose between bottom cabinets with doors or drawers. Drawers provide a better overview of the contents.
- Several of our mirrors and mirror cabinets feature built-in lighting. Always have a qualified electrician install them for you.
- Make sure that your bathroom furniture is appropriately shielded from your shower. The furniture can withstand the humid environment of a bathroom, but is not designed to be splashed with water on a regular basis.

WHAT WASHBASIN MATCHES WHICH CABINET? THE ANSWERS ARE PRESENTED BELOW.

CABINET WASHBASIN	WASHBASIN CABINET

The item numbers, dimension sketches and prices for these products are presented from page 102 onwards.

HANDLES

All handles suit all cabinets (apart from Nautic, which has décor profiles rather than handles). On the following product pages, we have chosen the handles we think best suit the respective cabinets, but you are free to mix and match according to your own taste and ideas. Here you can see all the handles you can choose between. The “c-c” measurement is the distance between the handle’s screw holes.

Modell A, c-c 220 mm, Classy Chrome

Modell B, c-c 32 mm, Classy Chrome

Modell C, c-c 200 mm, Classy Chrome

Modell D, c-c 64 mm, Classy Chrome

DÉCOR PROFILE

Nautic bathroom furniture units do not have handles – they are always delivered with white décor profiles instead. If you would prefer coloured profiles, you can choose between three different shades.

NB! Remember to order two profiles for each cabinet!

Length: 600 mm
For Nautic A903
Red, black or aluminium

Length: 900 mm
Till Nautic A904

WAHSBASIN UNITS FOR FURNITURE COMBINATION

- The dimensions of full-cover washbasin units are adapted to match the range of furniture with the same name.
- Some of the full-cover washbasins can be installed on brackets.
- Washbasins for building in or sub-mounting can be combined with a bottom cabinet and to top panel. Just make sure that the washbasin dimensions match the furniture unit.

WHAT KIND OF BATH?

Few things in life can compare to slipping into a hot bath at the end of a long, hard day. The comforting and relaxing effect of a bath is hard to beat. Gustavsberg bathtubs are not divided into product ranges as they suit most bathroom environments – and as an added bonus this year, there are a number of fixed installation tubs to

choose from as well. Our bathtubs feature a pure, modern design and can be finished with a range of front panels, which makes it easy for you to create a variety of solutions. Our proud tub on simple feet looks best of all if you give it some space.

FIXED INSTALLATION OR MOUNTED ON FEET?

Gustavsberg supplies a variety of bathtubs. If you are interested in an exclusive look for your bathroom, our fixed installation tubs may be a good option. Or you could choose a tub mounted on feet – in white or black, with replaceable feet. We also have tubs with exchangeable front panels that are available in several great mood colours. If you tire of one colour, it's simply a matter of replacing the front panel.

WELL THOUGHT-OUT AND EASY TO MAINTAIN

All Gustavsberg bathtubs are easy to clean in all areas. A full-front bathtub conceals the drain connection but can be very difficult to clean. To deal with this problem, our neat model features a simple solution: you can slide the front panel up to access the underside.

BASIN MODELS FOR ENAMELLED BATHTUBS WITH FRONT PANEL FRAMES OR FEET

The **standard tubs 1300–1700** and the **frontless model 1571** have the most common basin. It has a depth of 420 mm, which means that it is comfortable and practical for both baths and showers.

Combi-tubs 1607–1707 are perfect for people who often use their bathtubs as a shower base. These tubs feature a flat area at the foot end, and the drain is located in the centre of the tub. The head end is rounded and comfortable. The tub is slightly shallower than our standard tub – 380 mm – making it easier to step into and out of it.

The **Duo-tub 1603** is for two people to bath together. It has two sloping head ends and a centred drain.

Sitting tub model 1051 is designed for people who have a really small bathroom but who cannot do without a bath. It measures just 1,050 x 650 mm.

The **frontless bathtubs 6316 and 6368** feature an oval basin with two sloping head ends and a centred drain.

YOU CAN ORDER BATHTUBS WITH SPECIAL SUPPORT HANDLES ON THE RIM TO IMPROVE SAFETY AND EASE OF USE.

BATHTUBS ARE AVAILABLE WITH AN ANTI-SLIP TREATMENT WHERE QUARTZ SAND HAS BEEN BURNED INTO THE ENAMEL IN AN AESTHETICALLY NEUTRAL PATTERN. THE SURFACE COUNTERACTS THE RISK OF SLIPPING WHEN ENTERING OR LEAVING THE BATHTUB. MOREOVER, IT IS LOCATED AT THE FOOT END OF THE TUB SO THAT IT DOES NOT AFFECT THE OVERALL BATHING EXPERIENCE.

BASIN MODELS FOR ENAMELLED BATHTUBS FOR TILING IN

Fixed installation bathtubs 3400, 3500, 3600, 3970 These models feature the most common basin with a head and foot end. This basin model is comfortable and practical for both baths and showers and is available in several sizes.

Fixed installation bathtubs 1220, 1380 Designed for two people to bath together; features two sloping head ends and a centred drain. The basin has an attractive ellipse shape.

Fixed installation bathtubs 3310, 3311 Perfect for people who often use their bathtubs as a shower base. The tub features a straight, almost fastidious design, along with a generous flat area in the foot end for showering and a centred drain. The head end is sloped for a very comfortable bath.

Fixed installation bathtubs 6830, 6831 Ideal for people who have plenty of space and appreciate tight design. Perfect for two people to bath together; features two sloping head ends and a centred drain.

Fixed installation bathtubs 2570 and 2580 These models are intended for bathrooms where space is limited. With its bevelled foot end, you can always find room for this bathtub – even in small bathrooms.

OUR BATHTUBS ARE AVAILABLE WITH AN EXTRA SURFACE TREATMENT – GLAZEPLUS – WHICH IS A CRYSTAL-CLEAR POLYMER FILM THAT PROTECTS THE SURFACE OF THE BATHTUB AGAINST DIRT AND LIMESCALE DEPOSITS. THIS FACILITATES CLEANING AND REDUCES THE AMOUNT OF DETERGENT YOU NEED TO USE.

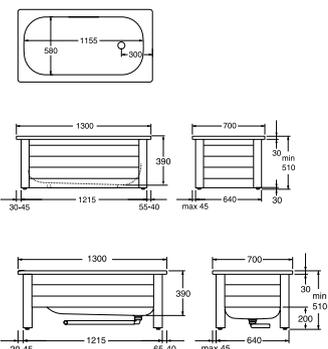

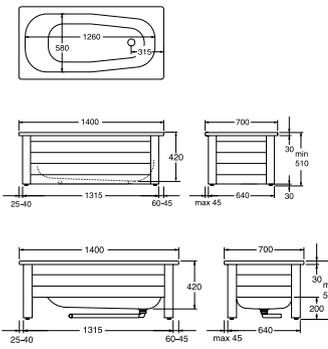

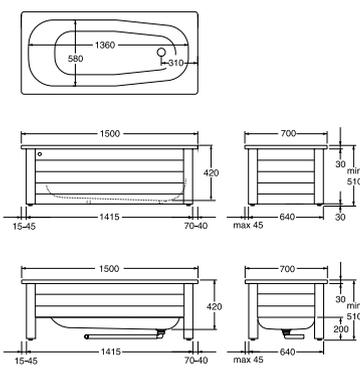

GOOD TO KNOW ...

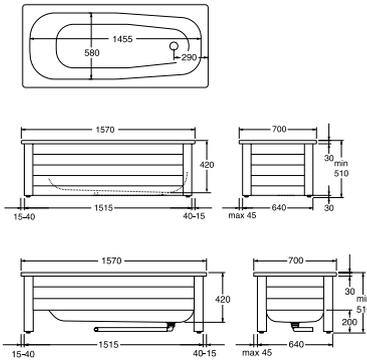

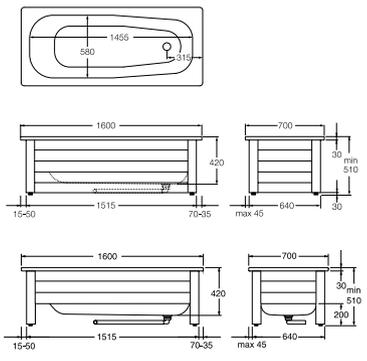

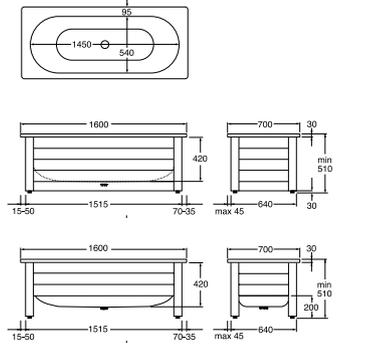

- Gustavsberg supplies bathtubs in all shapes and sizes – most intended for installation with full or half-depth panel stands. We also supply frontless bathtubs and tubs for tiling in.
- Our tubs are made of enamelled steel sheet, which is a tough and durable material.
- The bathtubs are easy to install and simple to clean. The front panels on our full-front tubs can be lifted up to make cleaning easier. Half-front panels on the other hand, always allow full access to the floor for cleaning.
- The side and base panels can be pushed sideways from the stand to make room for wall-mounted pipe work.
- The legs of this stand are located in the corners, making it almost impossible to tip our bathtubs over. The feet are adjustable, so the tub will always stand securely – even on a sloping floor surface.
- Our range also includes acrylic whirlpool bathtubs, which you can see on page 126.

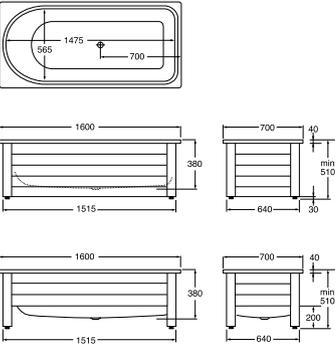

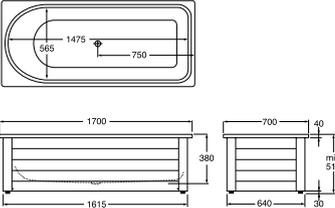

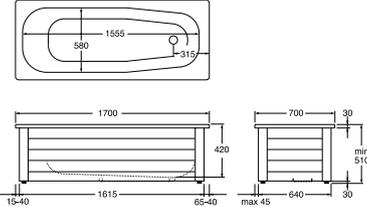

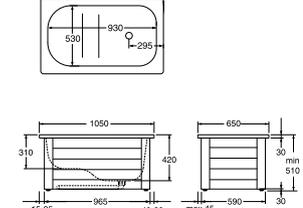

BATHTUBS IN ENAMELLED SHEET STEEL WITH FULL- OR HALF-FRONT PANEL

- Enamelled sheet steel
- Complete with front panel frame, fitted bottom valve and drain pipe
- The front panel frame can be slid sideways and back, allowing room to route pipes along the walls
- Adjustable feet, 25 mm
- Full front panel features a slidible lower section to facilitate cleaning
- Handles and anti-slip bottom surface
- Glazeplus as an option for simple and eco-friendly cleaning
- Front panel frame in different colours on several models

FANCY A WHIRL?

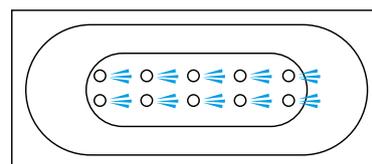

Taking a whirlpool bath is not just a delightful experience – it is also documentedly good for your health. The bubbles raise your body temperature and stimulate both your circulation and your metabolism. The Gustavsberg massage system mixes air and water in a manner that provides more effective water circulation and a better massage than other systems. Our massage bathtubs are rigorously checked and tested to guarantee quality and safety.

The pump instantly shuts off if the intake in the tub is covered or blocked, and the tubs are impossible to tip – even if you sit on the edge when the tub is empty. Our specially designed system also ensures that no residual water is left in the hoses, which results in improved hygiene. Check out the field and find the tub that you would like to take for a whirl ...

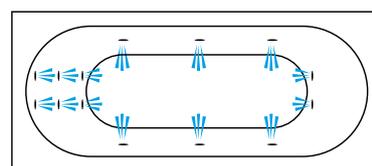

CHOOSE BETWEEN THREE DIFFERENT SYSTEMS

Your Gustavsberg massage bathtub can be fitted with one of three different massage systems, each of which provides a different experience:

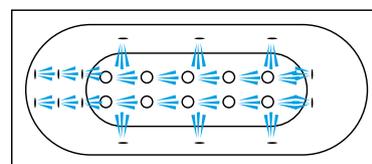

SYSTEM 1

Air stimulation from 10 bottom-mounted jets. Electronic pressure regulation. The jets can even be run with an interval function, which automatically increases and decreases the pressure. Also includes LED lighting.

SYSTEM 2

Steplessly adjustable massage system comprising two foot jets, six side jets and six back jets. Electronic pressure regulation. The jets can even be run with an interval function, which automatically increases and decreases the pressure. Also includes LED lighting.

SYSTEM 3

This is a combination of Systems 1 and 2 above. Air stimulation from 10 bottom-mounted jets. Massage system comprising two foot jets, six back jets and six side jets. Electronic pressure regulation. Interval function for air and water. Also includes LED lighting.

JETS AND LIGHTING

Bottom jets
Bathtubs with System 1 feature 10 bottom jets.

Back jets
Bathtubs with System 2 are fitted with 6 back jets.

Side jets and foot jets
Bathtubs with System 2 are fitted with 6 side and 2 foot jets.

LED lighting
All bathtubs with systems are fitted with LED lighting to heighten the relaxation factor in the bath. LED lights do not heat up on the exterior.

OPTIONS THAT GIVE YOU A LITTLE MORE

The following section presents tips and products to help you make even more of your massage bathtub:

Comfortable neck cushion

A neck cushion provides perfect support so that you can really relax. The material does not soak up water so the cushion remains fresh bath after bath.

Extra heat for extra luxurious baths

Add a maintenance heater to extend bath times. As extra protection, the heater cannot start unless there is sufficient water in the tub and the pump is running. It also features overheating protection.

Easier in, easier out

A number of our models can be supplemented with neatly designed and practical extra handles. These must be ordered together with the tub.

Easy to navigate

The whirlpool functions are simple to control using the panel on the bathtub rim. Green light: Function activated. Yellow light: Function can be activated. Red light: Indicates stand-by mode as the bathtub has not been filled with water.

YOU CAN ORDER THE BATHTUB WITH SUPPORT HANDLES ON THE RIM TO IMPROVE SAFETY AND EASE OF USE.

YOU CAN INSTALL MOST OF THE PRODUCTS YOURSELF. HOWEVER, THIS SYMBOL MEANS THAT WE RECOMMEND THAT YOU CONSULT A SKILLED PROFESSIONAL, SUCH AS A PLUMBER, A TILER OR AN ELECTRICIAN.

GOOD TO KNOW

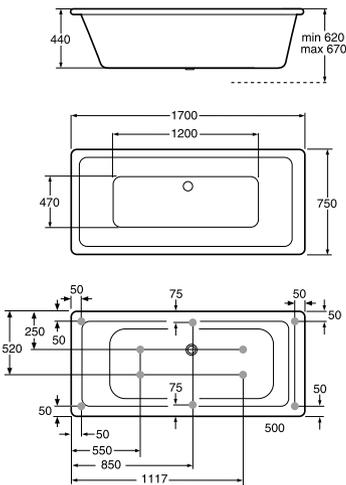

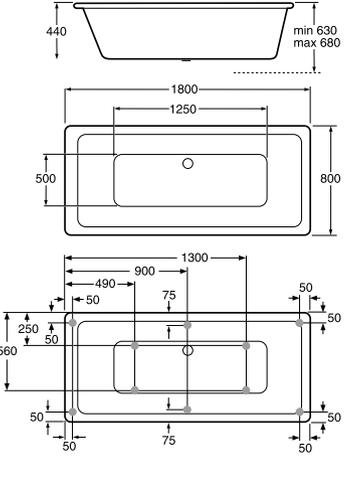

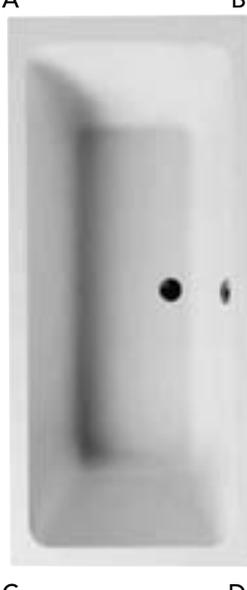

- The Gustavsberg massage system mixes air and water in a manner that provides better water circulation and a better massage than other systems. A range of unique solutions provide you an experience of the highest quality.
- All massage bathtubs feature safety intakes as standard. The pump instantly stops pumping if the intake in the tub is covered or blocked.
- A neat and simple rim-mounted control panel makes it simple for you to control your bathing experience.
- All massage bathtubs are fitted with a level sensor that protects against starting with insufficient water. A good feature for when inquisitive children press the buttons, for example.
- Gustavsberg has specially developed a system to ensure that no residual water is left in the hoses. For the best possible hygiene, bathtubs with bottom jets feature an automatic "blow-dry" function that starts after the tub has been emptied.
- Your tub will not tip if you sit on its edge – irrespective of whether it is filled with water or not. The front panel is easy to fit against the tub legs, and it will not come loose even if you move the tub.
- All our tubs are equally suitable for fixed installation and for fitting with a removable front panel. Make sure to choose the right placement of the front- and end-panel. They can not be shifted or ordered in retrospect.
- The bathtubs are supplied complete with a fitted bottom/rim drain and an anti-tip leg construction.
- Gustavsberg's bathtubs have been approved by RAL – Institute for quality assurance and certification. This guarantees the high quality of sanitary acrylics and fibre-plastic, for example.
- Every massage bathtub is checked and test run thoroughly before delivery.
- Gustavsberg provides a 10-year warranty on plastic tubs along with a 5-year material warranty and a 2-year in situ warranty.

DON'T FORGET ...

- Check the smallest adjustable height of the bathtub to make sure that it can pass through all doorways en route to the bathroom.
- Installation and repairs must only be performed by an authorised electrical fitter. Make sure to read and follow the instructions supplied with the tub.

ACRYLIC BATHTUB, ARTIC

- Complete with a fitted overflow outlet and anti-tip leg construction
- Ideal for fixed installation and for installation with front and end panels
- Complement with your choice of massage system
- Also available without massage system
- Complement with handle(s), neck cushion or maintenance heater for more pleasurable baths
- Safety intakes fitted as standard
- Control panel on bathtub edge
- Level sensor prevents the system from starting without water in the tub
- Rim-mounted mixer with filling via spout or overflow outlet as options
- Ventilation grille as an option
- RAL-approved – high quality sanitary acrylic
- Checked and test run prior to delivery

WHICH SHOWER SUITS YOUR BATHROOM?

Gustavsberg's showers maintain the highest standards of quality as regards both design and function, and they are available in a range of combinations to suit bathrooms of all types. However, before choosing the model you want, you should take some time to think about the conditions in your bathroom. For a shower corner, you need water-tight walls, a water-tight floor and a floor drain in the corner where you wish to install the shower. All Gustavsberg

wall and floor profiles are adjustable so you can be sure of a level shower even if the walls are angled and the floor slopes. A shower cabin is a versatile solution, especially if the floor in your bathroom cannot withstand the effects of water. The shower cabin itself functions as a water-tight space and requires only a minimum of work to install. A spare corner, connection to a water supply and a drain are all you need.

SHOWER WALLS AND CORNERS WITH SWING DOORS

BUILT-IN ELEVATING HINGES LIFT OUR SLIDING DOORS 5 MM. A BACKFLOW GUARD IS SUPPLIED FOR FITTING IF THE INCLINE TO THE FLOOR DRAIN IS NOT QUITE SUFFICIENT.

SHOWER CORNER WITH ROUNDED OR STRAIGHT SIDE-HUNG DOORS. THE DOORS OPEN BOTH INWARDS AND OUTWARDS – WHICH CAN SAVE VALUABLE SPACE IN A SMALL BATHROOM AVAILABLE IN SEVERAL SIZES.

SHOWER CABINS WITH ROUNDED SLIDING DOORS

Shower cabins are the best solution for rooms with walls and floors that may not be fully water-tight. Shower cabins are actually enclosed, water-tight units. All you need is a spare square metre and access to hot and cold water and a drain. This cabin comes with a built-in mixer and shower set. Choose between white or chromed profiles. Also available with straight doors.

NACQ 900 x 900 mm

SHOWER CABIN WITH STRAIGHT SLIDING DOORS

This model comes with a shower set, but needs to be completed with a shower mixer. Choose between white or chromed profiles.

NCC 800 x 800 mm

SHOWER CORNERS WITH SLIDING DOORS

SHOWER CORNER WITH ROUNDED SLIDING DOORS. CHOOSE BETWEEN CHROMED OR WHITE PROFILES. AVAILABLE IN MANY SIZES – ALSO WITH STRAIGHT DOORS.

TILT-IN AND ADJUSTABLE FLOOR PROFILE WITH "RUN-OFF HOLES" IN SLIDING DOORS.

HOLES FOR EXTERNAL PIPES IN EXTRA-WIDTH PROFILE ON SLIDING DOORS.

SHOWER WALL WITH STRAIGHT DOORS AND WHITE PROFILES.

NC 900 x 900 mm

SHOWER WALLS ARE CONSTANTLY SUBJECTED TO WATER, SOAP, OILS, SHAMPOO AND LIMESCALE. FOR THIS REASON, ALL GUSTAVSBERG SHOWERS ARE FITTED WITH "CLEAR GLASS" – A PROTECTIVE EXTERIOR LAYER THAT FACILITATES CLEANING AND HELPS REDUCE THE AMOUNT OF DETERGENT YOU NEED TO USE.

THE BOTTOM EDGE OF SHOWER CORNERS, WHERE THE DOOR MEETS THE FLOOR PROFILE, IS USUALLY VERY DIFFICULT TO KEEP CLEAN. OUR "TILT-IN" FUNCTION MAKES IT SIMPLE FOR YOU TO REMOVE THE SHOWER DOORS FROM THE FLOOR PROFILE FOR MORE EFFICIENT CLEANING AND IMPROVED HYGIENE.

THE ELEVATING HINGE IS A SMART DETAIL THAT LIFTS THE SHOWER DOOR 5 MM EVERY TIME YOU OPEN AND CLOSE IT. THIS MINIMISES WEAR ON BOTH THE FLOOR AND THE SHOWER DOORS. A PRACTICAL FUNCTION THAT PROVIDES A SENSE OF AUTHENTIC LUXURY.

GOOD TO KNOW ...

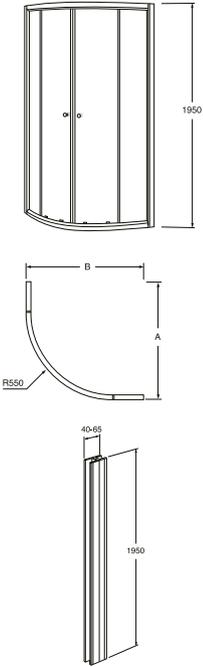

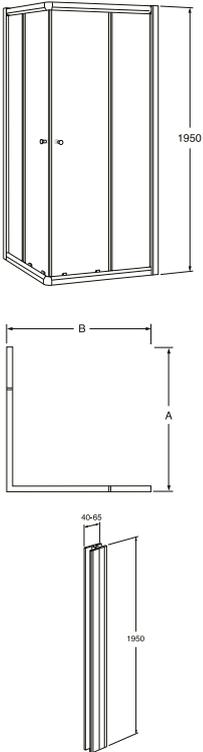

- Safety requirements are strict, and we test our products in accordance with CE norms for safety, function, tightness and durability.
- Our most popular model is the shower wall, which is usually fitted directly to a water-resistant floor that slopes gently down to a drain outlet.
- In order to be able to fit a shower cabin without any problems, your bathroom ceiling height should be at least 250 cm.

- When measuring the size of unequal-sided shower walls (e.g. 100 x 80), tape a corner on the floor and measure from left to right. This helps ensure that you measure correctly.

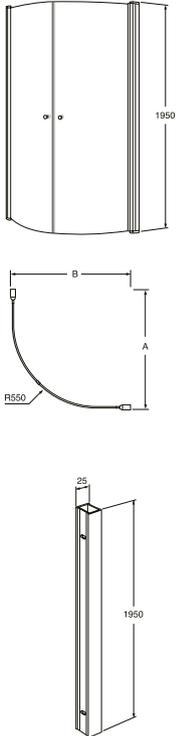

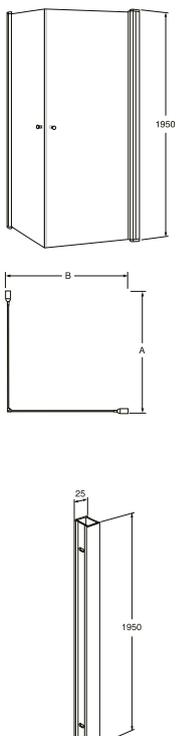

SLIDING DOORS FOR CORNER INSTALLATION

- Tempered safety glass
- Clear glass for simple, eco-friendly cleaning
- White or chromed profiles
- Pivot-in function for easy cleaning
- The 25 mm adjustable wall profile ensures a level shower even if the walls are angled.
- Pipe routing possible can be concealed in the wall profile
- Adjustable floor profile to ensure a level shower even if the floor slopes.
- Drainage holes in the floor profile convert the floor drain in the shower into an evacuation drain
- Widening profile, 40–65 mm as an optional extra. It is possible to connect multiple profiles.
- On the NC model, it is possible to work with unequal-sided measurement combinations

SWING DOORS FOR CORNER INSTALLATION

- Tempered safety glass
- Clear glass for simple, eco-friendly cleaning
- No floor profiles, has to be installed with a slope down to the floor drain.
- Chromed profiles
- Splash guard supplied for cases where the floor slope is not sufficient
- Rising hinges lift the doors 5 mm when they are opened
- Opening angle: 180 degrees
- The 20 mm adjustable wall profile ensures a level shower even if the walls are angled.
- Widening profile, 25 mm as an optional extra.
- Unequal-sided measurement combinations possible

WHAT ACCESSORIES DO YOU NEED?

Gustavsberg supplies two ranges of easy-to-fit accessories. They match our products perfectly and make it simple for you to compose a complete bathroom – without having to compromise on quality, function or design. All the accessories withstand moisture

and feature the high quality you can expect of Gustavsberg. The design idiom is pure and understated, with details in chromed brass and with a surface finish that gives your entire bathroom a little lift.

BATHROOM ACCESSORIES G1

Bathroom accessories that match our products perfectly. High quality in chromed brass with a perfect surface finish. G1 is distinguished by straight lines and right angles that provide an immediate sense of sober, restrained elegance.

G1-3824 HOOK

G1-3827 TOILET ROLL HOLDER

G1-3830 TOILET BRUSH

G1-3828 SPARE TOILET ROLL HOLDER

BATHROOM ACCESSORIES G2

Bathroom accessories that match our products perfectly. High quality in chromed brass with a perfect surface finish. In the G2 range, the straight lines are accompanied by a number of more rounded shapes. Round rails, jars and holders often appear warmer and more accommodating in an intimate setting. The design is still simple and cultured, but a little more playful. Modern, without appearing too strict and stringent.

G2-3844 HOOK

G2-3846 TOWEL HANGER

G2-3850 TOILET BRUSH

G2-3856 SOAP DISH

G2 FIXED CEILING-MOUNTED SHOWER

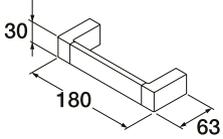

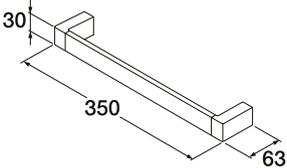

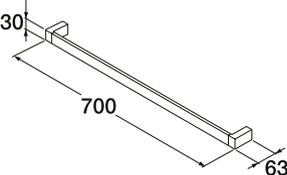

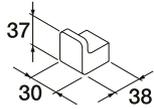

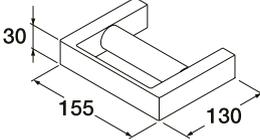

A corresponding item is also available in the G1 range.

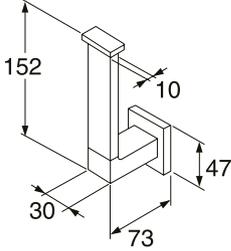

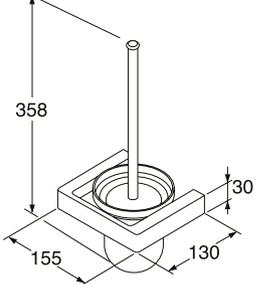

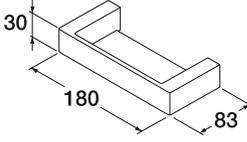

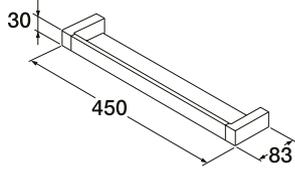

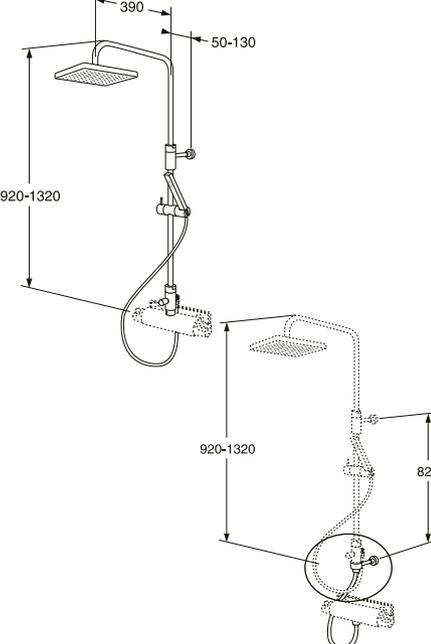

GOOD TO KNOW

- Make sure not to damage the sealant layer in your bathroom. If you drill any holes, make sure to seal them tightly.
- Ask your reseller or fitter for advice on the basis of the materials in your bathroom walls and how and where you intend to position the accessories.

BATHROOM ACCESSORIES G1

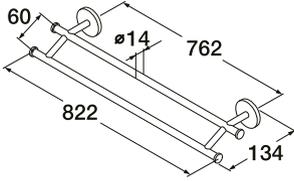

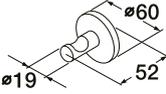

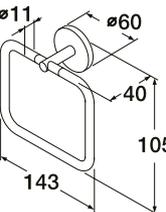

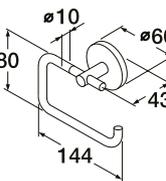

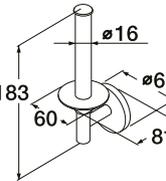

- Design distinguished by straight lines and right angles
- Chromed surface finish
- No visible fixing screws

DO YOU SAVE ENERGY WHILE BRUSHING YOUR TEETH?

Gustavsberg is at the cutting edge worldwide when it comes to mixers. Design, materials and the underlying technology are all second to none. With a mixer from Gustavsberg, you receive not only a product that will keep on working perfectly year after year, but also a fitting that helps you save energy and money every time you use it.

The reason for this is that, thanks to its genius design, the mixer ensures that you never use more or hotter water than you need. Over the years, Gustavsberg's patented energy-saving solutions have won numerous prestigious international awards and prizes – and we are still working to make them even more efficient.

INDEPENDENT CERTIFICATION

The Nordic Quality symbol is allocated to certified sanitation products in line with established requirements controlled by INSTA-CERT. These products meet set criteria for production, guarantee period, spare parts, documentation and technical suitability for installation in the Nordic region.

ENERGY-SAVING

A REVOLUTIONARY ENERGY-SAVING FUNCTION THAT CAN HELP REDUCE YOUR ENERGY CONSUMPTION BY 50%. THE SIMPLE SOLUTION IS BASED ON THE FACT THAT YOU HAVE TO MOVE THE LEVER ACTIVELY ALL THE WAY TO THE LEFT TO REACH THE MAXIMUM WATER TEMPERATURE. WHEN YOU RELEASE THE LEVER, IT AUTOMATICALLY RETURNS TO THE PRESET COMFORT TEMPERATURE, APPROX. 38–40 °C. THE COMFORT TEMPERATURE IS FULLY ADJUSTABLE TO MATCH INDIVIDUAL PREFERENCES.

WATER-SAVING

THIS MIXER HELPS YOU AVOID USING MORE WATER THAN NECESSARY. THE STARTING POSITION PROVIDES A PRESET COMFORT FLOW, WHICH IS SUFFICIENT FOR WASHING UP OR WASHING YOUR HANDS. FOR EXAMPLE, TO OPEN THE FULL FLOW, YOU NEED TO LIFT THE LEVER TO ITS HIGHEST POSITION. WHEN YOU RELEASE THE LEVER, IT AUTOMATICALLY RETURNS TO THE COMFORT FLOW POSITION. THE FLOW FUNCTION IS FULLY ADJUSTABLE TO SUIT INDIVIDUAL PREFERENCES.

ECO-START

AN ENERGY-ECONOMICAL MIXER THAT STARTS AUTOMATICALLY AT A TEMPERATURE OF 17 °C FROM ITS STARTING POSITION (LEVER STRAIGHT AHEAD), HELPING YOU SAVE BOTH ENERGY AND MONEY.

SENSOR-CONTROLLED MIXER

THE SMART SENSOR TECHNOLOGY AUTOMATICALLY HELPS YOU TO SAVE ENERGY AND AVOID WASTING WATER. THE MIXER TURNS ON WHEN YOU PLACE YOUR HANDS IN THE APPROPRIATE POSITION, AND SHUTS OFF AGAIN AS SOON AS YOU REMOVE THEM. DURING CLEANING, COVER THE SENSOR EYE TO DISABLE THE MIXER TEMPORARILY. POWERED BY A STANDARD BATTERY OR TRANSFORMER.

EVEN PRESSURE & TEMPERATURE

THERMOSTATIC MIXERS FEATURE BUILT-IN AUTOMATIC SCALD PROTECTION AND HOT-WATER SAFETY STOP WITH TYPE-APPROVED NON-RETURN VALVES. THIS MEANS THAT THE MIXERS REACT QUICKLY TO THE CHANGES IN TEMPERATURE AND PRESSURE THAT CAN ARISE IN THE WATER FLOW, AND EVEN OUT THE DIFFERENCES.

ANTI-BACTERIAL COLOUR

THE MIXER'S ANTI-BACTERIAL SURFACE TREATMENT ON ALL PAINTED LEVERS AND HANDLES COUNTERACTS THE SPREAD OF BACTERIA (SUCH AS PNEUMOCOCCI AND MULTI-RESISTANT BACTERIA), VIRUSES AND FUNGI, FOR EXAMPLE. THE SURFACE TREATMENT HAS A LONG-TERM EFFECT, PROVEN TO LAST FOR AT LEAST FIVE YEARS.

AUTO-REPAIR COLOURS

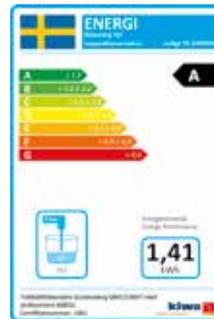

THE MIXER FEATURES UNIQUE AUTO-REPAIR PROPERTIES. IN PRACTICE, THIS MEANS THAT MINOR SCRATCHES WHICH APPEAR ON PAINTED LEVERS AND HANDLES IN THE LOGIC RANGE QUITE SIMPLY DISAPPEAR ON THEIR OWN. THE PAINTED SURFACE TREATMENT MAKES THE MIXER MORE DURABLE AND REDUCES THE RISK OF BACTERIA SPREADING.

WE NEVER BOAST. WE'D RATHER TELL YOU THE FACTS.

Our energy-saving washbasin mixers from the Nautic and Logic ranges were awarded the highest possible marks in the stringent efficiency tests developed by SIS TK 519 and Kiwa. The secret of our success is our unique heat and flow functions that result in the mixer immediately returning to its energy-saving comfort position as soon as you release the lever. In this way, it helps you to save incredible amounts of energy, water and even money – automatically. If you want hotter water or to increase the flow, simply move the mixer lever to its outermost position. Nautic and Logic models can also be individually customised, which is yet another feature that makes Gustavsberg mixers stand out from the competition. However, as we say, we never boast. We'd rather tell you the facts.

GUSTAVSBERG'S ENERGY-SAVING NAUTIC AND LOGIC MIXERS WERE AWARDED THE HIGHEST POSSIBLE MARKS WHEN SIS TK 519 AND KIWA TESTED THE ENERGY EFFICIENCY OF A VARIETY OF MIXERS.

GOOD TO KNOW ...

- As standard, all our kitchen and washbasin mixers feature our patented water-saving technology that saves thousands of litres of water every year. And money, too.
- You can adjust or even deactivate all the energy and water-saving functions in our mixers to suit your individual needs.
- All the components are made of food approved materials.
- All our mixers are recyclable. Moreover, they are largely made of recycled metal. When new mixers are installed, 95% of the old ones are recycled. The brass is made into new "raw material" that the brass factory uses to make rods and bars which go into the production of mixers.
- Simple instructions make it easy for you to set up and use your mixer. For example, you can adjust the scald protection quickly and easily without any specialist tools.
- All single-lever mixers feature ceramic seals. These are tested for at least 450,000 pin movements, which is the equivalent of around 20 years of normal use.
- Kitchen mixers are available with shut-offs for dishwashers and washing machines. One of the requirements for the new installation of kitchen mixers is that the water cut-off be located above the worktop. A practical solution is therefore to integrate this cut-off into the mixer.
- Many stainless worktops are so thin that a kitchen mixer with a high spout may feel a little unstable. Therefore, we recommend fitting our mixers on worktops made of thicker material, or in the worktop itself. However, our range does include a stay to keep the mixer stable on thin worktops, too.
- Self-draining outdoor taps are a smart solution. When you turn them off, they automatically drain the water from the pipes in the wall. This eliminates the risk of costly water damage.
- Many of our washbasin mixers are available with a practical side shower for installing on the wall. The shower matches all washbasins, and if you position it close to a toilet, it makes an excellent substitute for a bidet.

IMPORTANT CONCEPTS

The following pages present a number of technical terms that may need a little explanation:

Water connections refers to the pipes that are connected to the water supply. Our mixers have flexible water connections, which are approved for the Nordic market and facilitate installation.

c-c is a measurement ("centre–centre") that refers to the distance between your incoming supply pipes for hot and cold water.

"Change-over" selectors are a feature of bathtub mixers and determine whether the water comes out of the bath spout or the shower head.

WANT TO PEEL POTATOES IN A MORE ECO-FRIENDLY WAY?

A lot of water is used in the kitchen. Far too much, in fact. Leaving the water running may not sound all that dangerous, but we harm the environment when we use more energy than we need. In addition, we pour money down the drain. Literally. Gustavsberg's

kitchen mixers automatically help to ensure that you never use more hot water than you need. In practice, this means that you can save both energy and money, even if you insist on peeling potatoes under running water.

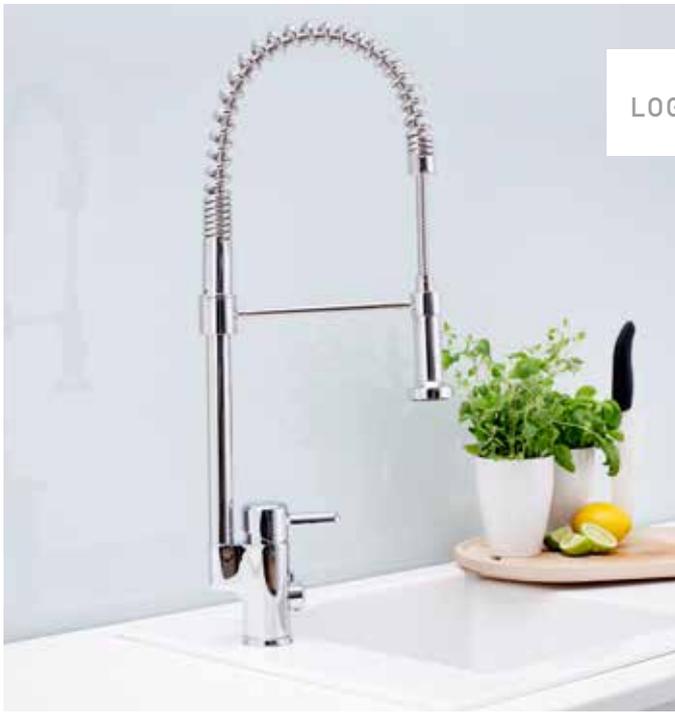

NAUTIC KITCHEN MIXER

Our elegant Nautic mixer is environmentally certified and features functions designed to save both energy and water. It starts at a temperature of 30 °C (lever straight), which is often sufficient. On account of the built-in energy- and water-saving functions, you must actively move the lever up or to the side to increase the temperature or the flow. When you release the lever, it automatically returns to its original energy-saving position. You can adjust or even deactivate all the energy and water-saving functions in our mixers to suit your individual needs.

Nautic mixers are available with low or high spouts. In fact, there are two different versions of the high-spout model.

LOGIC KITCHEN MIXER

Our Logic mood mixer is packed with smart features, both inside and out. It is also the first mixer that can change its identity thanks to exchangeable levers in a variety of colours. The painted levers have been given an anti-bacterial, auto-repairing surface that prevents scratches. This is particularly beneficial in kitchens, where you work with foods. In addition, the Logic mixer contains the same water and energy-saving functions as the Nautic models.

GOOD TO KNOW

- As standard, all our kitchen and washbasin mixers feature our patented water-saving technology that saves thousands of litres of water every year. And money, too.
- You can adjust or even deactivate all the energy and water-saving functions in our mixers to suit your individual needs.
- Our mixers can be recycled. All the components are made of food approved materials.
- Simple instructions make it easy for you to set up and use your mixer. For example, you can adjust the scald protection quickly and easily without any specialist tools.
- Kitchen mixers are available with shut-offs for dishwashers and washing machines.
- All single-lever mixers feature ceramic seals. These are tested for at least 450,000 pin movements, which is the equivalent of around 20 years of normal use.
- One of the requirements for the new installation of kitchen mixers is that the water shut-off be located above the worktop. A practical solution is therefore to integrate this shut-off into the mixer.
- Many stainless worktops are so thin that a kitchen mixer with a high spout may feel a little unstable. Therefore, we recommend fitting our mixers on worktops made of thicker material, or in the worktop itself. However, our range does include a stay to keep the mixer stable on thin worktops, too.

LOGIC WASHBASIN MIXERS

- Energy classification A
- Adjustable comfort flow
- Adjustable comfort temperature
- Approved flexible water connection for easier installation
- Coloured levers as an option
- Possible to lock the hot water temperature for increased scald protection
- Function adaptation with optional levers (see www.gustavsberg.com)
