

Quality of life since 1825

New
design,
expanded
collection!

The thermostatic mixers of tomorrow

For bath and shower.

This is what the future looks like

In a sustainable society, even the wonderful "me time" you spend in your bathroom should also be kind on the environment – and your wallet. That is why we are now launching Gustavsberg's well-known thermostatic mixer in a new design and with upgraded features.

The thermostatic mixers of tomorrow make the bathroom a more sustainable space for builders, fitters and – in particular – users of the new product. Gustavsberg's new thermostatic mixers constitute a tangible step towards our vision of being a completely carbon-neutral company by 2030. The new, expanded collection is intended to replace all older models in all ranges.

THERMOSTATIC MIXERS FOR EVERYONE

Our new thermostatic mixers are easy to install, to understand and to use. With a large selection of lead-free mixers. With a new design that suits most bathrooms perfectly. With an aesthetically pleasing and practical click-on shelf, and a functionally adapted handle. In short, something for everyone looking to enjoy life in the bathroom to the full.

“The old thermostatic mixer design has served us faithfully for more than 20 years – but the new design idiom is lighter, neater and better thought-out.”

Anna Marciniak, Product Manager Taps

The new thermostatic bath and shower mixers feature an organic, timeless design that blends in seamlessly with Gustavsberg's entire collection of stylish rain shower heads and shower sets. But the beauty extends far below the surface:

“SMART INSIDE”

A number of the new thermostatic mixers feature “Smart Inside” technology with replaceable functions that can be upgraded to fulfil future environmental requirements and points systems (from the Swedish Green Building Council and BREEAM, for example). In practice, this entails an extended service life and even better sustainability.

REDUCED EMISSIONS EVERY STEP OF THE WAY

The new thermostatic mixers weigh around 20% less than the older models. They also contain less brass, which means a reduction in carbon emissions as early as in the manufacturing phase. Lower weight also translates into a reduction in emissions from transport.

MADE IN SWEDEN

Another significant environmental benefit is that Gustavsberg's thermostatic mixers are produced locally in Sweden – more specifically, in Vårgårda.

shower mixer with
click-on-shelf

Designed for long, sustainable service

All thermostatic mixers in Gustavsberg's new, expanded collection feature energy- and water-saving technology. They will therefore lessen the load on their users' wallets and reduce impact on the environment for decades to come.

BUILT FOR SIMPLE INSTALLATION

The fact that the new thermostatic mixers weigh less facilitates installation even further, easing the burden on both professional fitters and DIY enthusiasts.

"The new thermostatic mixers weigh less and are incredibly easy to install. This means less strain on hard-working fitters."

– Anna Marciniak

BUILT TO SUIT ALL NEEDS

Families with young children can choose a thermostatic mixer with automatic scald protection that regulates the water temperature, thus eliminating the risk of scalding. Other smart functions include: hot-water shut-off, type approved non-return valves, a Safe Touch function, an expanded lead-free collection and a variety of accessories including easy-to-grip handles.

New Nautic shower mixer with easy-to-grip handle to facilitate use for disabled people

Estetic bathtub mixer with fixed spout, click-on shelf and mixer fitting

New design in all ranges

NEW NAUTIC – FULFILLS ALL REQUIREMENTS

The New Nautic range is intended for professionals and for everyone who makes the highest demands on quality, on function and on saving energy and water. The thermostatic mixers feature the latest technology and smart solutions that make them much more sustainable in the long term. Several models in the New Nautic range are also lead-free.

NORDIC – SUITS ALL BATHROOMS

The Nordic range presents safe and secure functionality. The range is limited to the most common models and with its pared down idiom, the timeless design matches all bathrooms perfectly.

ATLANTIC – SOMETHING FOR EVERYONE

The Atlantic range meets stringent requirements from professional fitters and DIY enthusiasts alike. The design is stylistically pure, and the collection has been expanded even further in connection with the new launch.

ESTETIC – THE NEATEST OPTION OF ALL

The Estetic range is designed for everyone who appreciates the highest possible design factor in the bathroom. The new thermostatic mixer will be available in both chrome and matt black finish. A smart click-on shelf elegantly conceals the fixing point, at the same time as providing additional surface space.

SHOWER MIXER WITH BATHTUB SPOUT

Another addition to the collection is a thermostatic mixer with a fixed bathtub spout. Bathtub and Shower mixer combinations are common, and the new, expanded collection from Gustavsberg makes it easy to create a neat, uniform look in the bathroom.

SMARTEST SHELF

A smart click-on shelf is included in the delivery or available as an optional extra. It neatly conceals the wall fitting and provides practical surface space where it is most needed.

BEST IN ENERGY CLASS

A new option for everyone who is extra passionate about the environmental aspect: One of our lead-free shower mixers from the Nautic range is supplied with an Energy class A rain shower head set.

EVEN PRESSURE

Thermostatic mixers feature built-in automatic scald protection and hot-water safety stop with type-approved non-return valves. This means that the mixers react quickly to the changes in temperature and pressure that can arise in the water flow, and even out the differences.

SAFE TOUCH

All thermostatic mixers from Gustavsberg are fitted with a safe touch function, which means they are designed to lead the hot water along the rear side of the mixer. This minimises the heat level on the front side of the thermostat, thus reducing the risk of burns.

LEAD-FREE

The mixer is made of material whose total weight includes less than 0.1% Lead. As such, it is an eco-smart mixer that meets stringent requirements with reference to lead content. The mixer features a discreet laser marked symbol on its rear side to facilitate traceability.

SMART INSIDE

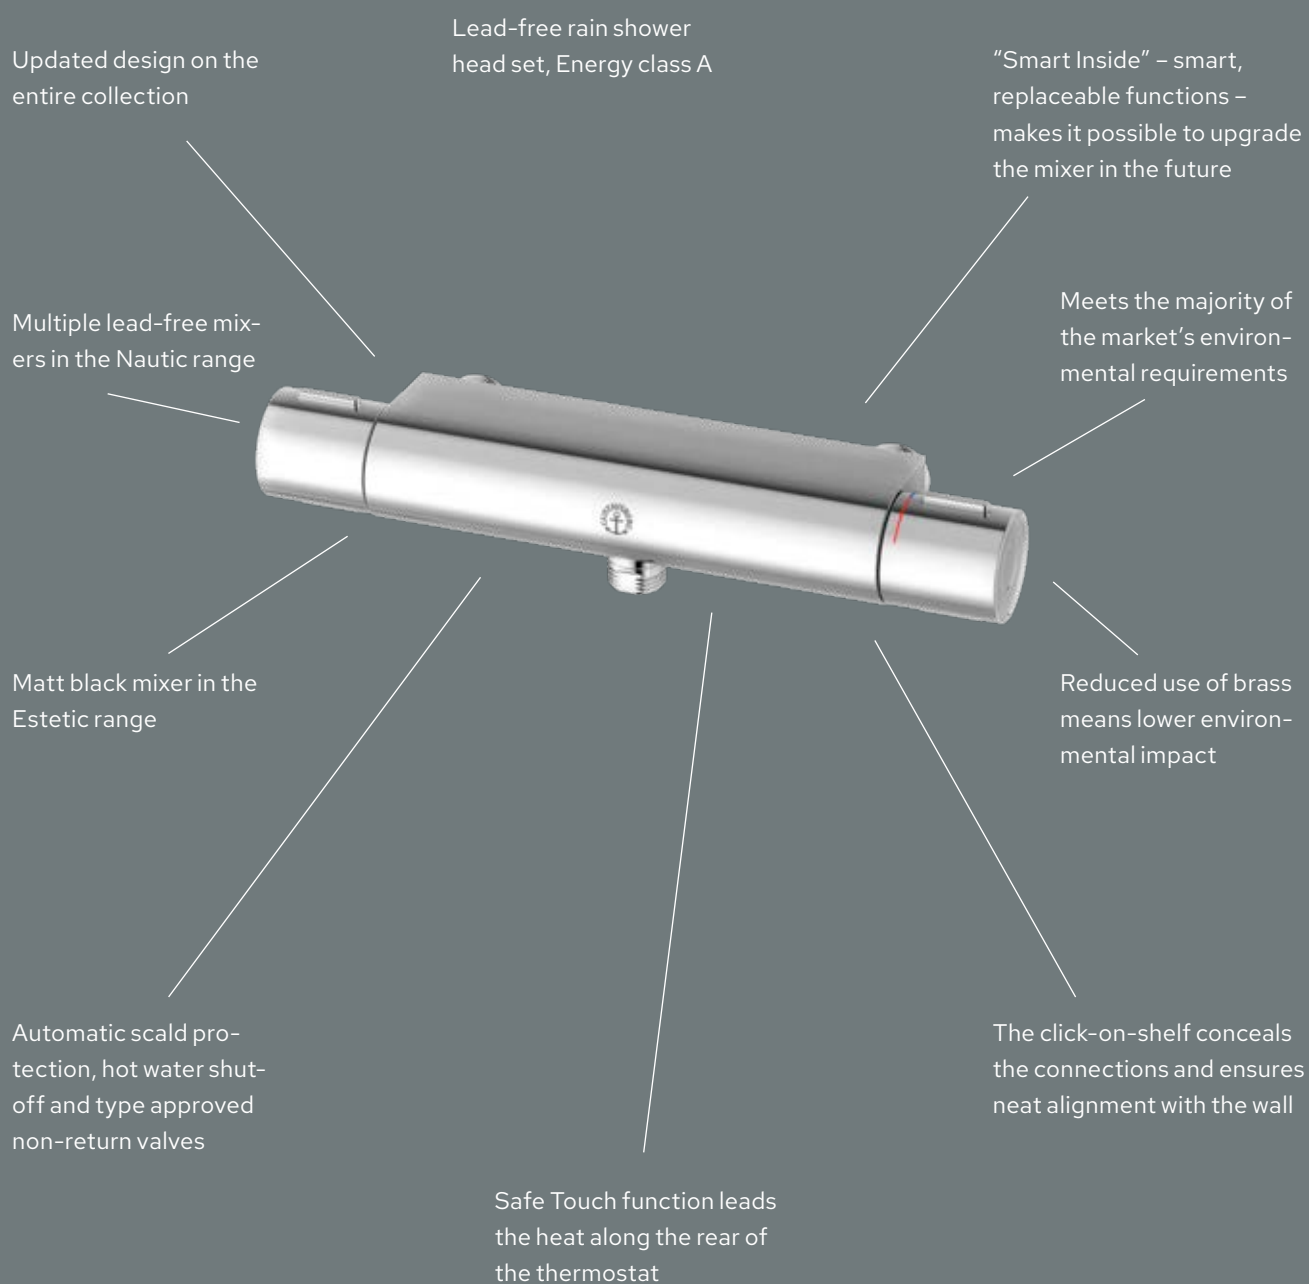

Thanks to the smart, replaceable components, the mixer can be upgraded in the future to add new, even smarter functions. This extends the mixer's lifetime and makes it even more sustainable.

A more sustainable life in the bathroom with Gustavsberg

Gustavsberg has been a pioneer, powering the development of sanitary products for the bathroom since the early 1900s. Today, we all need to be smarter to achieve a lifestyle that does not damage our planet, and in this context, too, our ambition is to take the lead and show the way.

Visit our website to find out more about how we are working more sustainably.
